## Quarterly Budget Review Statement

### 31 March 2022

#### Report by Responsible Accounting Officer

The following statement is made in accordance with Clause 203(2) of the Local Government (General) Regulations 2005:

**It is my opinion that the Quarterly Budget Review Statement for Walcha Council for the quarter ended 31 March 2022 indicates that Council's projected financial position at 30 June 2022 will be satisfactory at year end, having regard to the projected estimates of income and expenditure and the original budgeted income and expenditure**

Signed

Christian Martin  Date 20/05/2022

Responsible Accounting Officer

INCOME STATEMENT	2021-2022 ORIGINAL BUDGET	2021-2022 AMENDED BUDGET				YTD ACTUAL	Comment
		QBR1 Approved Variation	QBR2 Proposed Variation	QBR3 Proposed Variation	Total Amended		
General Fund	-1,755,200	660,908	-27,680	-40,000	-1,161,972	-1,802,182	Q3 - Reduce road base sales revenue of \$40,000 as no gravel won in 2022.
Water Fund	-138,500	0	0	34,985	-103,515	-10,592	Decrease forecast loss with removal of interest on loan that has not been taken up.
Sewer Fund	-27,400	0	0	-90,213	-117,613	-80,924	Significantly higher than budgeted due to testing and instrumentation trials to reduce in the 2023 financial year
Consolidated Funds	-1,921,100	660,908	-27,680		-1,383,100	-1,893,699	

**Note:** The forecast loss of \$1.383M does not include loss on disposal of assets. The bridge renewal program that is currently being undertaken will result in decommissioned bridges with high book values being written off to the Income Statement and while it will not have an effect on cashflow it will still impact our business performance and financial ratios. The loss on disposal is estimated to be between \$800K and \$1.1M depending on the number decommissioned by 30 June 2022.

CAPITAL		QBR1 Approved Variation	QBR2 Proposed Variation	QBR3 Proposed Variation	Total Amended	YTD ACTUAL	Comment
General Fund	5,936,300	12,881,923	1,544,791	-9,075,159	11,287,855	7,653,367	Q3 - Move bridge renewal program into 2023 budget Q3 - Move urban roads rehab into 2023 budget Q3 - Move swimming pool upgrade into 2023 budget
Water Fund	9,575,000	340,332	0	-8,525,000	1,390,332	691,605	Q3 - Offcreek storage project moves majority to 2023 financial year
Sewer Fund	200,000	0	0	0	200,000	41,809	Q3 - No change with various small works
Consolidated Funds	15,711,300	13,222,255	1,544,791	-17,600,159	12,878,187	8,386,781	

**Note:** QBR1 indicates a \$12.9M variation as carry forward projects were not included in the original budget for the General Fund. With a review completed for Q3 as part of the 2023 budget process a significant value of project expenditure has now been moved to 2023 including the bridge renewal program, off creek storage project and various others.

CASHFLOW		QBRs Q1 Approved Variation	QBRs Q2 Proposed Variation	QBRs Q3 Proposed Variation	Total Amended	YTD ACTUAL	Comment
General Fund	8,900	-227,994	-27,680	159,396	-87,378	2,826,632	YTD includes capital grant funding received
Water Fund	-7,700	0	0	184,985	177,285	-384,660	YTD includes timing of water rates received
Sewer Fund	-1,300	0	0	-182,213	-1,300	-24,478	
Consolidated Funds	-100	-227,994	-27,680	162,168	88,607	2,417,494	

**Note:** The QBRs Q1 adjustment is largely due to overrunning projects from the prior financial year. Q3 is seeing an improvement on cashflow as Council reviews expenditure and takes measures to ensure cashflow does not fall. There is additional expenditure on chemicals and trials to limit algae in the treatment ponds which is expected to be reduced in the 2023 Financial Year.

	Jun-21	Mar-22
Total Cash & Investments	5,575,603	9,262,259
External Restrictions:		
Specific Purpose Grants	3,162,921	0
Water Fund	57,952	-12,384
Sewer Fund	563,482	527,496
	3,784,355	515,112
Internal Restrictions	4,252,795	4,252,795
<b>Unrestricted Cash</b>	<b>-2,461,547</b>	<b>4,494,352</b>

**Note:** Water fund is currently calculated as a negative reserve position. This was a likely scenario as the opening reserves were only \$58K. A review with Finance and Infrastructure will determine any contingency that can be taken to correct this prior to 30 June 2022 as the current. Sewer fund is using some reserves to cover the current loss which is forecast.

# PERFORMANCE RATIOS

## QUARTERLY BUDGET REVIEW AT 31 MARCH 2022 Forecast to June 2022

		Benchmark	General Fund	Water Fund	Sewer Fund	Consolidated	Comment
<b>Operating Performance Ratio</b>							
This ratio measures Council's achievement of containing operating expenditure within operating revenue.	Min >0% Prior year		-7.01% -2.51%	-16.76% -14.19%	-5.83% -9.68%	-7.44% -3.17%	All funds are forecasting an operating deficit. This is not sustainable and Council must find ways to operate within its means.
<b>Own Source Operating Revenue Ratio</b>							
This ratio measures fiscal flexibility. It is the degree of reliance on external funding sources such as operating grants & contributions	Min >60% Prior year		27.68% 41.82%	8.88% 42.14%	88.93% 87.24%	24.13% 42.68%	This Council has recently struggled to meet this ratio due to high levels of funding for Drought and Bushfire affected communities as well as increased infrastructure grant funding.
<b>Unrestricted Current Ratio</b>							
To assess the adequacy of working capital and its ability to satisfy obligations in the short term for the unrestricted activities of Council.	Min >1.5 Prior year		1.75 2.69	3.13 2.42	9.54 16.66	1.83 2.69	Council needs to manage its cashflow, particularly with several large projects in progress.
<b>Debt Service Cover Ratio</b>							
This ratio measures the availability of operating cash to service debt including interest, principal & lease payments.	Min >2 Prior year		105.02 18.06	84.04 54.00	34.05 na	95.55 19.43	The ratios include the proposed borrowings included in the current budget.
<b>Rates, Annual Charges, Interest &amp; Extra Charges Outstanding</b>							
To assess the impact of uncollected rates and annual charges on Council's liquidity and the adequacy of recovery efforts.	Max <10% Prior year		3.82% 5.62%	7.19% 0.00%	10.65% 0.00%	4.54% 4.90%	Debt collection ratio is very good overall. High water and sewer ratios arise from timing of water billing.
<b>Cash Expense Cover</b>							
This liquidity ratio indicates the number of months Council can continue to pay for its immediate operating costs without additional cash inflow.	Min >3 Prior year		4.28 3.85	4.57 1.23	8.95 17.92	4.40 4.08	Water Fund ratio is a concern and needs to be carefully managed as construction of the Off Stream Storage gets underway.
<b>Infrastructure Backlog Ratio</b>							
This ratio shows what proportion the backlog is against the total value of Council's infrastructure value.	Min <2% Prior year		0.63% 3.85	-1.55% 1.23	-2.68% 17.92	0.44% 4.08	This ratio is dependant on Asset Management Plans which are currently out of date.

## Development Assessment Report

<b>DA Number:</b>	10.2020.3	<b>Council:</b>	Walcha
<b>Location:</b>	1643 Oxley Highway, Walcha Road		
<b>Development Description:</b>	Basalt Rock Quarry - 29,000m <sup>3</sup> /annum		
<b>Title Details:</b>	Lot 103 DP753846, Lot 2 DP1173956, Lots 46 & 47 DP1082562		

### Proposal Overview

The proposed development is a production – total resource may consist of 450,000m<sup>3</sup>. Will be developed further if market demand is founded. This will require additional DA approval.

It is planned to market gravel and aggregate within a radius of about 100 kilometres of the quarry. More distant customers are unlikely given significant transport costs and the availability of alternative sources of quarry products.

Maximum disturbance areas arising from quarry related operations will be 1.9878 hectares.

DOMAIN	DISTURBANCE	DIMENSIONS	AREA (Ha)
Quarry	Quarry void, stockpiles, crushing equipment, office/amenities	Odd shape shown in Figure 3.	1.6455
Access track	Quarry access track from Brooklyn boundary to edge of quarry site.	Existing 928m. 3.5m wide	0.3248
Access track passing bays	Passing bays at 185m intervals along quarry access track.	50m long & 3.5m wide. Five bays	0.0175
<b>TOTAL</b>			<b>1.9878</b>

Excavation of the basalt rock will be undertaken using earth-moving machinery such as an excavator, front-end loader and/or bulldozer, on a sporadic basis in response to customer orders. It will be necessary to drill and blast all rock prior to excavation.

The quarry void will reach a maximum:

- Depth of 30 metres.
- Surface extent about 100 metres (east-west) by 160 metres (north-south), with a roughly rectangular shape.

The maximum expected frequency of blasting is once per week. No on site explosives storage is proposed. All explosives will be delivered to the site for immediate, or following day, use. Delivery will be via a dangerous goods licensed, purpose built truck, operated by a commercial explosives supplier.

Initially it is proposed to establish quarry benches about 5 metres high by 5 metres wide, although it is expected that bench height will probably be increased over time to 10 metres. Bench heights will only be changed after consideration of all relevant factors, including:

- Geotechnical issues:- Ground stability is determined by a combination of factors including layering (thickness, composition & strength), jointing (natural crack patterns) and faults/fractures.
- Worker safety.
- Productivity.

Most of the basalt excavated will be subject to processing, including one or more of the following:

- Using grizzly bars to separate over size boulders from soil and rock.
- Splitting over size boulders using hydraulic splitters and/or hydraulic hammers.
- Crushing and screening to produce a range of sized aggregates.

Material that may be stockpiled within the quarry site includes:

- Excavated basalt, gravel, soil and processed aggregate.
- Waste rock that is not suitable for sale. This material may be useful for rehabilitation, such as battering the edges of the quarry.
- Top soil, for future rehabilitation.

Initially staff amenities will consist of a portable toilet and/or ATCO style portable lunch room/amenities building (<25 square metres). If subsequent circumstances warrant, an office area (<25 square metres) may be added (or combined) with the amenities area.

Actual traffic volumes will depend on the demand for quarry products, which is expected to fluctuate significantly from year to year and cannot be reliably predicted at this time.

**Estimated quarry traffic at various production levels.**

LCM (m3)	TONNES	TRUCKS	STAFF	CONTRCTR		TOTAL VEHICLES	VEHICLES
		(2 way) year	(2 way) FTE	(2 way) year	(2 way) year		/WRK DAY 261/YR
1,000	2,400	130	0.2	100	20	250	1
5,000	12,000	649	1	500	30	1,179	5
10,000	24,000	1,297	2	1,000	50	2,347	9
20,000	48,000	2,595	4	2,000	84	4,679	18
29,000	69,600	3,762	5.8	2,900	118	6,780	26

The applicants propose to establish a new access driveway from the Oxley Highway into Brooklyn that will improve vehicle visibility, access and safety. The existing access will be decommissioned and fenced off. The design has been developed to be consistent with Transport for NSW requirements documented in a letter to Walcha Council dated 26 May 2020.

The proponent is committed to establishing the new highway access consistent with Council and Traffic for NSW requirements within 6 months of the quarry achieving 5,000m<sup>3</sup> in commercial sales.

The threshold is proposed on the basis that it would be unreasonable to require compliance with all Traffic for NSW standards prior to significant commercial activity, when:

- The initial impacts of the development on the highway will be relatively minor during the commencement phases of the development.
- Staged compliance will facilitate the viability of the development.

The 5,000m<sup>3</sup> threshold is equivalent to about 12,500 tonnes of quarry product at a density of about 2.5 tonnes per cubic metre. If the product is shipped within a year, this equates to about 337 trucks per year (~37 tonnes each) or 1.3 trucks per working day (~250 work days/year).

Several trees in the immediate vicinity of the proposed new Oxley Highway access will impair visibility between the access track and Highway.

Clearing of trees for rural infrastructure, such as fences and tracks, is permitted on the "Brooklyn" holding without any other approval under Part 5A and schedule 5A of the Local Land Services Act 2013. Item 31(b) in schedule 5A allows 30m clearing for fence, effectively 15m within "Brooklyn" holding.

Initial activities will be undertaken on a sporadic basis in response to orders, hence there may be significant periods of negligible or relatively small scale activities. If a consistent demand for quarry products can be developed, then activities will be maintained in a manner consistent with the maximum hours in Table below.

**Proposed maximum hours of operation.**

ACTIVITY	MON TO FRI	SAT & SUN	PUBLIC HOLIDAYS
Blasting	8:00 to 17:00	No activity	No activity
Drilling, extraction & processing	Daylight hours		
Loading trucks & product shipping			
Maintenance	24 hours per day, when required

### Application Type

- Is this application an Integrated Development Application? Yes  No
- Is this application a Designated Development Application? Yes  No
- Is this application for State Significant Development? Yes  No
- Is this application submitted by/on behalf of a Public Authority? Yes  No
- Is this application a staged Development? Yes  No
- Is this application a section 96 amendment? Yes  No

**Date of original development consent:**

### Concurrence/Referral

*Section 4.13 – EP & A Act*

- Does this application require concurrence referral? Yes  No
- Does this application require courtesy comment? Yes  No

Department	Concurrence	Courtesy	Comments/Issues Raised
Geological Survey of NSW – Mining, Exploration & Geoscience	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	<i>GSNSW has reviewed the Statement of Environmental Effects for the above DA and have no issues or concerns to raise. They requested that the proponent provide annual production data to the Department for the site as a condition of consent.</i>
Transport for NSW	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	<p>TfNSW highlights that in determining the application under the <i>Environmental Planning and Assessment Act 1979</i>, it is the Consent Authority's responsibility to consider the environmental impacts of any road works which are ancillary to the development. This includes any works which form part of the proposal and/or any works which are deemed necessary to include as requirements in the conditions of project approval. No objection to the development with the following recommendations: The Consent Authority:</p> <ul style="list-style-type: none"> <li>• should be satisfied that the application has sufficiently explained the impacts of the development and justified all proposed mitigation measures.</li> <li>• condition the maximum daily and hourly movements generated by the development.</li> <li>• request an assessment of turn treatment warrants in accordance with the Austroads Guide to Traffic Management Part 6 and Austroads Guide to Road Design Part 4A for the site access, identifying the existence of the minimum basic turn treatments and addressing the need for any warranted higher order treatments.</li> </ul>

			<ul style="list-style-type: none"> <li>condition all redundant accesses to be legally and physically closed prior to commencement of use of the new access.</li> <li>prior to determination have strategic (2D) design drawings of all proposed improvements to public roads and the site access to mitigate the traffic and road safety impacts of the development.</li> <li>condition that a Traffic Management Plan (TMP) be developed addressing the construction, operation and decommission phases of the proposed development.</li> <li>consider the need for any regulatory signage (truck turning signs) and where necessary seek the endorsement of the Local Traffic Committee prior to Council approval the signage.</li> <li>any future roadwork on the classified (State) road will need to be designed and constructed in accordance with the current Austroads Guidelines, Australian Standards and TfNSW Supplements. The developer will be required to enter into a Works Authorisation Deed (WAD) with TfNSW for any roadwork deemed necessary on the classified (State) road. The developer will be responsible for all costs associated with the roadwork and administration for the WAD.</li> </ul> <p>The above response was forwarded onto the developer who included information to address these issues in the revised Statement of Environmental Effects.</p>
--	--	--	--

Does this application require referral for decision by Council?

Yes  No

### Local Environmental Plan

Section 4.15(1)(a)(i) and Section 4.15(a)(ii) – EP & A Act

**This land is zoned:** RU1 Primary Production

**Development as per Standard Definitions:** This development is considered to be an extractive industry.

**extractive industry** means the winning or removal of extractive materials (otherwise than from a mine) by methods such as excavating, dredging, tunnelling or quarrying, including the storing, stockpiling or processing of extractive materials by methods such as recycling, washing, crushing, sawing or separating, but does not include turf farming.

**Note** — Extractive industries are not a type of **industry**—see the definition of that term in this Dictionary.

**extractive material** means sand, soil, gravel, rock or similar substances that are not minerals within the meaning of the Mining Act 1992.

Clause	Compliance	Comment
Land Use Table	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	This is permissible development.
6.1 Earthworks	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	An erosion & Sediment Control Plan was submitted as part of the application. It was reviewed by GSNSW who had not comment to make regarding any deficiency.

Is there a draft LEP or draft LEP amendment which may affect this proposal?

Yes  No

Do 'existing use' provisions (Sections 4.65-4.70 of the EP&A Act) apply to this development?

Yes  No

## Development Control Plan

*Section 4.15(1)(a)(iii) & Section 4.15(3A) – EP & A Act*

Is there a DCP which applies to this land/proposal?

Yes  No

### List the relevant clause/clauses under the applicable DCP

Clause	Control	Compliance	Comment
4.4(i)	Sewage	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	A Section 68 Application will be required.
4.4(j)	Bushfire	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	No residential use of the quarry site will occur, most of the provisions of Planning for Bushfire Protection, published by the NSW Rural Fire Service, are not relevant to this proposal. However those applicable have been complied with.
4.4 (l)	Koala Habitat	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	Site contains remnant mature Red Stringy Bark ( <i>Eucalyptus macrorhyncha</i> ) and woollybutt ( <i>Eucalyptus banksii</i> ) trees. Neither species identified as a koala feed tree in Schedule 2 of State Environmental Planning Policy 44. Highly disturbed nature of site means that site is quite unlikely to be used by species in any ongoing manner.
4.5	Vehicular Access Requirements	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	Compliance can be achieved with the use of appropriate conditioning. See comments from TfNSW and Engineering Assessment
4.6 (a)	Slopes >20%	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	Maximum slope of site along southern boundary is 18% (10°).
4.8	Land Use Buffers	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	<p>The closest unrelated residences are:</p> <ul style="list-style-type: none"> <li>• “Yarooga Park”, more than 1,150 metres to the north.</li> <li>• “Mt Pleasant”, more than 1,500 metres to the north east.</li> <li>• “Yarooga”, more than 1,700 metres to the north west.</li> <li>• Village of Walcha Road, more than 2,200 metres to the north west.</li> </ul> <p>The proposed quarry site is not visible from any dwelling or the Oxley Highway due to natural screening by a mix of topography (Appendix L) and vegetation (Appendix M &amp; Appendix K).</p> <p>The NSW Department of Primary Industries recommends a minimum buffer of 1,000m between extractive industries using blasting and neighbouring unrelated residences as a conflict avoidance strategy. This proposal is clearly compliant with the NSW Department of Primary Industries recommendation.</p>

Has a variation to the DCP been requested?

Yes  No

Is there a draft DCP which may affect this proposal?

Yes  No

## Regional Environmental Plan

There is no REP applicable to this area.

## State Environmental Planning Policy

Is this proposal affected by a SEPP?

Yes  No

List all relevant SEPPs		
SEPP	Compliance	Comment
<b>SEPP 19 — Bushland in Urban Areas</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>The SEPP aims to protect and preserve bushland within the urban areas because of its value to the community as part of the natural heritage, its aesthetic value, and its value as a recreational, educational and scientific resource.</i>
<b>SEPP 21 – Caravan Parks</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>The SEPP ensures that where caravan parks or camping grounds are permitted under an environmental planning instrument, movable dwellings, as defined in the Local Government Act 1993, are also permitted.</i>
<b>SEPP 33 — Hazardous and Offensive Development</b>	Not Applicable <input type="checkbox"/> Applicable <input checked="" type="checkbox"/>	<i>The SEPP provides considerations for consent for hazardous &amp; offensive development.</i>
<b>Complies</b>	Yes <input type="checkbox"/> No <input type="checkbox"/> Comment Only <input type="checkbox"/>	<p>Definition</p> <p><b>hazardous industry</b> means a development for the purposes of an industry which, when the development is in operation and when all measures proposed to reduce or minimise its impact on the locality have been employed (including, for example, measures to isolate the development from existing or likely future development on other land in the locality), would pose a significant risk in relation to the locality—</p> <p style="margin-left: 40px;">(a) to human health, life or property, or</p> <p style="margin-left: 40px;">(b) to the biophysical environment.</p> <p><b>offensive industry</b> means a development for the purposes of an industry which, when the development is in operation and when all measures proposed to reduce or minimise its impact on the locality have been employed (including, for example, measures to isolate the development from existing or likely future development on other land in the locality), would emit a polluting discharge (including, for example, noise) in a manner which would have a significant adverse impact in the locality or on the existing or likely future development on other land in the locality.</p> <p>A hazardous industry' under SEPP 33 is one which, when all locational, technical, operational and organisational safeguards are employed continues to pose a significant risk.</p> <p>A proposal is 'potentially offensive industry' consent authorities need to determine whether, in the absence of safeguards, the proposal would emit a polluting discharge which would cause a significant level of offence.</p> <p>This development is not considered to be either offensive all hazardous as all impact can be controlled with mitigation measures.</p>
<b>SEPP 36 – Manufactured Homes Estates</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>The SEPP helps establish well-designed and properly serviced manufactured home estates in suitable locations.</i>

<b>SEPP 44 — Koala Habitat Protection</b>	Not Applicable <input type="checkbox"/> Applicable <input checked="" type="checkbox"/>	<i>This SEPP applies to land across NSW that is greater than one (1) hectare and is not a National Park or Forestry Reserve. The SEPP encourages the conservation and management of natural vegetation areas that provide habitat for koalas to ensure permanent free-living populations will be maintained over their present range.</i>
<b>Complies</b>	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Comment Only <input type="checkbox"/>	<p>This policy applies to this Local Government Area as it is listed in Schedule 1 of this SEPP and the property is more than 1 ha in area.</p> <p>Site contains remnant mature Red Stringy Bark (<i>Eucalyptus macrorhyncha</i>) and woollybutt (<i>Eucalyptus banksii</i>) trees. Neither species identified as a koala feed tree in Schedule 2 of State Environmental Planning Policy 44. Highly disturbed nature of site means that site is quite unlikely to be used by species in any ongoing manner.</p>
<b>SEPP 47 – Moore Park Showground</b>	Not Applicable <input checked="" type="checkbox"/>	<i>Applies to the land shown edged heavy black on the map marked "Moore Park Showground Amendment No 1."</i>
<b>SEPP 50 Canal Development</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>This SEPP bans new canal estates from the date of gazettal, to ensure coastal and aquatic environments are not affected by these developments.</i>
<b>SEPP 55 — Remediation of Land</b>	Not Applicable <input type="checkbox"/> Applicable <input checked="" type="checkbox"/>	<i>This SEPP applies to land across NSW and states that land must not be developed if it is unsuitable for a proposed use because of contamination.</i>
<b>Complies</b>	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Comment Only <input type="checkbox"/>	<p>This SEPP requires consideration of whether there have been any activities carried out on land in the past that may have resulted in contamination. If contamination may be present, the proponent is required to undertake suitable investigation and, if necessary, remediation works.</p> <p>It is considered that there have been no prior contaminating land uses and the site is suitable for the proposed use.</p> <p><i>No significant sources of contamination were observed on the proposed development site or nearby during inspections. A targeted search was made for evidence of issues commonly associated with grazing land, such as:</i></p> <ul style="list-style-type: none"> <li>• <i>Rubbish &amp; rubbish dumps (eg tyres, lead batteries, wire, glass, car bodies, asbestos building materials, herbicide containers, pesticide containers, etc).</i></li> <li>• <i>Sheep/cattle dips (contamination from arsenic, organophosphates, etc).</i></li> <li>• <i>Fuel tanks/workshops (oil and diesel spills).</i></li> </ul>
<b>SEPP 64 — Advertising and Signage</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>The SEPP aims to ensure that outdoor advertising is compatible with the desired amenity and visual character of an area, provides effective communication in suitable locations and is of high-quality design and finish.</i>
<b>SEPP 65 — Design Quality of Residential Flat Development</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>The SEPP relates to residential flat development across the state through the application of a series of design principles. Provides for the establishment of Design Review Panels to provide independent expert advice to councils on the merit of residential flat development.</i>

<b>SEPP 70 – Affordable Housing (Revised Schemes)</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>This SEPP identifies that there is a need for affordable housing across the whole of the State and describes the kinds of households for which affordable housing may be provided and makes a requirement with respect to the imposition of conditions relating to the provision of affordable housing.</i>
<b>Aboriginal Land 2019</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>This SEPP provides for development delivery plans for areas of land owned by Local Aboriginal Land Councils to be considered when development applications are considered, and declares specified development carried out on land owned by Local Aboriginal Land Councils to be regionally significant development.</i>
<b>Affordable Rental Housing 2009</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>The SEPP provides for an increase in the supply and diversity of affordable rental and social housing in NSW.</i>
<b>Building Sustainability Index: BASIX 2004</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>The SEPP provides for the implementation of BASIX throughout the State.</i>
<b>Coastal Management 2018</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>This SEPP promotes an integrated and co-ordinated approach to land use planning in the coastal zone in a manner consistent with the objects of the Coastal Management Act 2016, including the management objectives for each coastal management area.</i>
<b>Concurrences 2018</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>This SEPP allows the Planning Secretary to act as a concurrence authority.</i>
<b>Educational Establishments and Child Care Facilities 2017</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>This SEPP facilitates the effective delivery of educational establishments and early education and care facilities across the state.</i>
<b>Exempt and Complying Development Codes 2008</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>The SEPP provides exempt and complying development codes that have State-wide application, identifying, in the General Exempt Development Code, types of development that are of minimal environmental impact that may be carried out without the need for development consent; and, in the General Housing Code, types of complying development that may be carried out in accordance with a complying development certificate.</i>
<b>Gosford City Centre 2018</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>This SEPP applies to the Gosford City Centre.</i>
<b>Housing for Seniors or People with a Disability 2004</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>The SEPP aims to encourage provision of housing for seniors, including residential care facilities. The SEPP provides development standards.</i>
<b>Infrastructure 2007</b>	Not Applicable <input type="checkbox"/> Applicable <input checked="" type="checkbox"/>	<i>The SEPP provides a consistent approach for infrastructure and the provision of services across NSW, and to support greater efficiency in the location of infrastructure and service facilities.</i>
<b>Complies</b>	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Comment Only <input type="checkbox"/>	<i>The Oxley Highway is a NSW Roads and Maritime Services "classified road", hence Council is required to comply with clause 101 of State Environmental Planning Policy (Infrastructure) 2007 when considering this Development Application. Sub-clause 101(2) is the most relevant part, as reproduced below:  (2) The consent authority must not grant consent to development on land that has a frontage to a classified road unless it is satisfied that—  (a) where practicable and safe, vehicular access to the land is provided by a road other than the classified road, and</i>

		<p>(b) the safety, efficiency and ongoing operation of the classified road will not be adversely affected by the development as a result of—</p> <p>(i) the design of the vehicular access to the land, or</p> <p>(ii) the emission of smoke or dust from the development, or</p> <p>(iii) the nature, volume or frequency of vehicles using the classified road to gain access to the land,</p> <p>Matters arising from sub-clause 101(2) are:</p> <ul style="list-style-type: none"> <li>• (2)(a) – There is no alternative road via which vehicular access is practicable.</li> <li>• (2)(b)(i) – The proponent has outlined a proposal for improved Oxley Highway access in section 2.6 and provided preliminary designs (Appendix I) consistent with Transport for NSW requirements (Appendix H).</li> <li>• (2)(b)(ii) – The proposed quarry site is located more than 700 metres (direct line) from the Oxley Highway at the closest point, hence significant dust impacts from quarry operations are quite unlikely. Potential dust from trucks transporting quarry products through the “Brooklyn” property onto the Oxley Highway will be managed as outlined in section 4.3.1.</li> <li>• (2)(b)(iii) – Quarry traffic estimates have for various levels of production have been prepared and included as Appendix G. The actual number is expected to fluctuate significantly from year to year depending on the actual number of orders and the volume of product required, as noted previously. These estimates have been used to prepare appropriate designs for highway access (Appendix 1)</li> </ul>
<b>Kosciuszko National Park – Alpine Resorts 2007</b>	Not Applicable <input checked="" type="checkbox"/>	<i>This SEPP applies to part of Kosciuszko national park, and to Kosciuszko Road and the Alpine Way. The part of Kosciuszko Park to which the policy applies is the land described as the ski resort area in Part 8A of Schedule 6 to the Act.</i>
<b>Kurnell Peninsula 1989</b>	Not Applicable <input checked="" type="checkbox"/>	<i>This SEPP applies to land within the Shire of Sutherland, known as Kurnell Peninsula, and adjacent waterways.</i>
<b>Mining, Petroleum Production &amp; Extractive Industries 2007</b>	Not Applicable <input type="checkbox"/> Applicable <input checked="" type="checkbox"/>	<i>The SEPP aims to provide proper management of mineral, petroleum and extractive material resources and ESD.</i>
<b>Complies</b>	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Comment Only <input type="checkbox"/>	<p><i>Clause 12 of State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007 requires the consent authority, Walcha Council, to consider the compatibility of the proposed quarry with existing, approved and likely preferred land uses in the vicinity, amongst other things. The proposal is compatible with such uses given that:</i></p> <ul style="list-style-type: none"> <li>• <i>The quarry is located within a RU1 Primary Production zone.</i></li> <li>• <i>Council does not have any publicly available planning proposals or policy documents indicating that it is considering rezoning any land in the vicinity.</i></li> </ul>

		<ul style="list-style-type: none"> <li>On a local, regional and state wide basis quarries are predominantly located in RU1 Primary Production zones along with a mix of agricultural, forestry and resource extraction industries.</li> <li>The quarry will provide a source of gravel and aggregate for the local community.</li> <li>The quarry has a substantial buffer of more than 1 kilometre to the nearest unrelated dwelling.</li> </ul> <p>Clause 15 of the SEPP requires the consent authority to consider the efficiency the development in terms of resource recovery. The proposed quarry will extract rock in an orderly manner subject to demand, which is typical of such quarries in similar settings.</p> <p>Clauses 14, 16 and 17 require the consent authority to consider the imposition of conditions relating to natural resource management, environmental management, transport and rehabilitation.</p>
<b>Miscellaneous Consent Provisions 2007</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	This SEPP provides for the erection of temporary structures and the use of places of public entertainment while protecting public safety and local amenity.
<b>Penrith Lakes Scheme 1989</b>	Not Applicable <input checked="" type="checkbox"/>	This SEPP applies to the land shown edged heavy black on the structure plan relating to Penrith Lakes.
<b>Primary Production and Rural Development 2019</b>	Not Applicable <input type="checkbox"/> Applicable <input checked="" type="checkbox"/>	This SEPP facilitates the orderly economic use and development of lands for primary production; reduce land use conflict and sterilisation of rural land.
<b>Complies</b>	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Comment Only <input type="checkbox"/>	The development would meet the aims of this SEPP particularly (b) in that the site is located where there will be minimal land use conflict or sterilisation of primary production land.
<b>State and Regional Development 2011</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	This SEPP identifies development that is State significant development or State significant infrastructure and critical State significant infrastructure and to confer functions on joint regional planning panels to determine development applications.
<b>State Significant Precincts 2005</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	This SEPP facilitates the development, redevelopment or protection of important urban, coastal and regional sites of economic, environmental or social significance to the State so as to facilitate the orderly use, development or conservation of those State significant precincts for the benefit of the State, and facilitates service delivery outcomes for a range of public services and to provide for the development of major sites for a public purpose or redevelopment of major sites no longer appropriate or suitable for public purposes.
<b>Sydney Drinking Water Catchment 2011</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	This SEPP provides for healthy water catchments that will deliver high quality water while permitting compatible development.
<b>Sydney Region Growth Centres 2006</b>	Not Applicable <input checked="" type="checkbox"/>	This SEPP co-ordinates the release of land for residential, employment and other urban development in the Orth West Growth Centre, the South West Growth Centre and the Wilton Growth Area.
<b>Three Ports 2013</b>	Not Applicable <input checked="" type="checkbox"/>	This SEPP provides a consistent planning regime for the development and delivery of infrastructure on land in Port Botany, Port Kembla and the Port of Newcastle

<b>Urban Renewal 2010</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>This SEPP establishes the process for assessing and identifying sites as urban renewal precincts, and facilitates the orderly and economic development and redevelopment of sites in and around urban renewal precincts,</i>
<b>Vegetation in Non-Rural Areas 2017</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>This SEPP protects the biodiversity values of trees and other vegetation in non-rural areas of the State, and to preserves the amenity of non-rural areas of the State through the preservation of trees and other vegetation.</i>
<b>Western Sydney Employment Area 2009</b>	Not Applicable <input checked="" type="checkbox"/>	<i>This SEPP protects and enhances the land known as the Western Sydney Employment Area for employment purposes.</i>
<b>Western Sydney Parklands 2009</b>	Not Applicable <input checked="" type="checkbox"/>	<i>This SEPP puts in place planning controls that will enable the Western Sydney Parklands Trust to develop the Western Parklands into a multi-use urban parkland for the region of western Sydney.</i>

**List all relevant Draft SEPPs**

<b>SEPP</b>	<b>Compliance</b>	<b>Comment</b>
<b>SEPP 55 — Remediation of Land</b>	Not Applicable <input type="checkbox"/> Applicable <input checked="" type="checkbox"/>	<i>The proposed SEPP will provide a state-wide planning framework for the remediation of land; require consent authorities to consider the potential for land to be contaminated when determining development applications; clearly list the remediation works that require development consent; and introduce certification and operational requirements for remediation works that can be undertaken without development consent.</i>
<b>Complies</b>	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Comment Only <input type="checkbox"/>	See Comment above.
<b>SEPP - Environment</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>This consolidated SEPP proposes to simplify the planning rules for a number of water catchments, waterways, urban bushland, and Willandra Lakes World Heritage Property. Changes proposed include consolidating the following seven existing SEPPs:</i> <ul style="list-style-type: none"> <li>• <i>State Environmental Planning Policy No. 19 – Bushland in Urban Areas</i></li> <li>• <i>State Environmental Planning Policy (Sydney Drinking Water Catchment) 2011</i></li> <li>• <i>State Environmental Planning Policy No. 50 – Canal Estate Development</i></li> <li>• <i>Greater Metropolitan Regional Environmental Plan No. 2 – Georges River Catchment</i></li> <li>• <i>Sydney Regional Environmental Plan No. 20 – Hawkesbury-Nepean River (No.2-1997)</i></li> <li>• <i>Sydney Regional Environmental Plan (Sydney Harbour Catchment) 2005</i></li> <li>• <i>Willandra Lakes Regional Environmental Plan No. 1 – World Heritage Property.</i></li> </ul>
<b>SEPP – Housing Diversity</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<i>This SEPP aims to facilitate the delivery of diverse and affordable housing to meet the needs of the State's growing population and support the development of a build-to-rent sector. It introduces new definitions for build-to-rent housing, student housing and co-living;</i> <ul style="list-style-type: none"> <li>• <i>amends some state-level planning provisions, particularly for boarding house and seniors housing development;</i></li> <li>• <i>amends some state-level planning provisions to</i></li> </ul>

		<p>support social housing developments undertaken by the NSW Land and Housing Corporation (LAHC) on government-owned land; and</p> <ul style="list-style-type: none"> <li>• consolidates three housing-related SEPPs <ul style="list-style-type: none"> <li>○ State Environmental Planning Policy (Affordable Rental Housing) 2009</li> <li>○ State Environmental Planning Policy (Housing for Seniors and People with a Disability) 2004</li> <li>○ State Environmental Planning Policy No 70 – Affordable Housing (Revised Schemes).</li> </ul> </li> </ul>
<b>SEPP (State &amp; Regional Development)</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<p>The proposed changes will:</p> <p>Remove the \$30 million capital investment value criteria for upgrades of water treatment facilities associated with an existing facility.</p> <ul style="list-style-type: none"> <li>• Fast-track the approval process so drought related water treatment facility upgrades can be delivered quicker.</li> <li>• Allow Sydney Water to respond to future drought conditions.</li> </ul> <p>The proposed changes will allow facilities unlikely to have a significant environmental impact on the environment to be assessed by water supply public authorities, instead of a longer State Significant Infrastructure assessment process.</p> <p>Any new water treatment facilities will still be assessed as State Significant infrastructure. The proposed changes won't apply to desalination plants, new water treatment facilities or water storage facilities.</p>
<b>SEPP (Infrastructure)</b>	Not Applicable <input checked="" type="checkbox"/> Applicable <input type="checkbox"/>	<p>This amendment aims to clarify and streamline the planning assessment for the extension and maintenance of the Wild Dog Fence.</p> <p>The proposed amendment includes:</p> <ul style="list-style-type: none"> <li>• <b>Extension:</b> amend Clause 132 to allow an extension of the fence to be considered as State Significant Infrastructure (subject to a detailed assessment) replacing the need to seek multiple government approvals for different parts of the fence.</li> <li>• <b>Maintenance:</b> include provisions under Clause 132 that permit routine maintenance of the fence to be carried out as exempt development.</li> </ul>

### Planning Agreement

Section 1.15(1)(a)(iia) – EP & A Act

Is there a Planning Agreement in force under section 93F of the EP&A Act? Yes  No

Has a Planning Agreement been offered under this development? Yes  No

### Local Strategic Planning Statement

#### Walcha Community Strategic Plan Alignment

Applicable

#### Transport

CSP 1.1 Walcha will be serviced by an integrated and efficient transport network. Yes  No

### **Business & Jobs**

CSP 2.1 - Commercial and tourist development will be promoted and encouraged to grow in harmony with the natural environment, to take maximum advantage of commercial opportunities and to increase local employment. Yes  No

### **Health**

CSP 3.1 - Health services and facilities will be provided and where appropriate managed locally to meet the needs of the community. Yes  No

CSP 3.2 - The public health and wellbeing of the community will be protected and enhanced. Yes  No

### **Education and Training**

CSP 4.1 - Education and training opportunities will be provided that deliver the skills and knowledge needed to advance the community. Yes  No

### **Stronger Community**

CSP 5.1 - Social services will be planned, maintained and coordinated so that they meet the current and future needs of all groups in the community. Yes  No

CSP 5.2 - The existing strong community spirit and pride will be protected and promoted. Yes  No

CSP 5.3 - Walcha's cultural identity will be enhanced. Yes  No

CSP 5.4 - Walcha's Aboriginal communities will be supported and strengthened. Yes  No

CSP 5.5 - Young people will be retained and supported to live in Walcha. Yes  No

CSP 5.6 - People of all ages and abilities will be encouraged to participate in cultural, recreational and sporting activities. Yes  No

CSP 5.7 - Community members will be given the opportunity to develop their leadership skills so that they can better participate in the leadership of the community. Yes  No

### **Local Environment & Liveable Communities**

CSP 6.1 - Walcha's distinct and diverse natural and built environment will be protected and enhanced. Yes  No

CSP 6.2 - Solid waste will be managed in a sustainable manner with a continuing reduction in waste generation and disposal to landfill. Yes  No

CSP 6.3 - Water supply and sewerage services will be physically and environmentally sensitive. Yes  No

CSP 6.4 - Walcha will increase the use and production of renewable energy. Yes  No

CSP 6.5 - Agricultural activities will be environmentally sustainable. Yes  No

CSP 6.6 - The character of Walcha and its surrounding villages will be maintained while protecting the productivity of our rural land. Yes  No

### **Keeping People Safe**

CSP 7.1 - Police stations and staff numbers will be provided to effectively control and reduce crime and antisocial behaviour and to keep our community safe. Yes  No

CSP 7.2 - Emergency Services will be provided to ensure the safety of our community and visitors. Yes  No

### **Better Government**

CSP 8.1 - Walcha Council will exemplify good leadership, mutual respect and trust by being inclusive, ensuring open information and communication and encouraging active anticipation at all levels. Yes  No

CSP 8.2 - Council rate funding for local government projects will be supplemented by income generated from other sources. Yes  No

CSP 8.3 - The boundaries of the Walcha Local Government Area will be modified to reflect existing and developing communities of interest. Yes  No

Planning Priority	Applicable
PP 1 - Encourage diversification in grazing agriculture, horticulture and agribusiness to grow these sectors and respond to domestic and international opportunities	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
PP 2 - Foster resilience and diversification in the agricultural industry to respond to the ageing farming workforce and climate change	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
PP 3 - Expand nature-based adventure and cultural tourism places and enhance visitor experiences	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
PP 4 - Deliver a variety of housing options in Walcha and promote development that contributes to the unique character of Nowendoc, Walcha Road and Woolbrook	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
PP 5 - Raise the area's profile and awareness of employment, business development and lifestyle opportunities, particularly for younger people and provide services for the ageing population	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
PP 6 - Continue to develop access and logistics infrastructure on appropriate sites to encourage new industry opportunities	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
PP 7 - Protect and celebrate our unique sense of place	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
PP 8 - Identify and promote wind, solar and other renewable energy production opportunities; manage and support the transition to renewable energy	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>

New England North West Regional Plan Alignment	Applicable
Direction 1 - Expand agribusiness and food processing sectors	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 2 - Build agricultural activity	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 3 - Protect and enhance productive agricultural lands	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
Direction 4 - Sustainably manage mineral resources	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 5 - Grow New England North West as the renewable energy hub of NSW	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 6 - Deliver new industries of the future	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 7 - Build strong economic centres	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
Direction 8 - Expand tourism and visitor opportunities	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 9 - Coordinate growth in the cities of Armidale and Tamworth	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 10 - Sustainably manage and conserve water resources	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 11 - Protect areas of potential high environment value	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 12 - Adapt to natural hazards and climate change	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 13 - Expand emerging industries through freight and logistics connectivity	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 14 - Enhance transport and infrastructure networks	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>
Direction 15 - Facilitate air and public transport infrastructure	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 16 - Coordinate infrastructure delivery	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 17 - Strengthen community resilience	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 18 - Provide great places to live	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 19 - Support healthy, safe, socially engaged and well connected communities	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 20 - Deliver greater housing diversity to suit changing needs	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>
Direction 21 - Deliver well planned rural residential housing	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>

Direction 22 – Increase the economic self-determination of Aboriginal Communities Yes  No

Directions 23 - Collaborate with Aboriginal communities to respect and protect Aboriginal culture and heritage Yes  No

Direction 24 - Protect the region's historic heritage assets Yes  No

Strategy	Action
Generate new industry opportunities	The condition and capability of the road network to support the freight sector, increase connectivity, and accommodate new industry opportunities.

Has the applicant submitted any supporting planning assessments? Yes  No

**Comment:** Statement of Environmental Effects – Version 1.2 August 2020

### Subdivision

Is this application for subdivision? Yes  No

**Comment:** Consolidation of lots will be required as a condition of development consent. This is to ensure that the quarry only sits on a single lot.

### Environmental Impacts

Section 4.15(1)(b) – EP & A Act

Does this proposal have any potential impact on:

	Impact	Comment																																																				
Social	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	<p>No significant negative social impacts are expected given the:</p> <ul style="list-style-type: none"> <li>Rural setting of the quarry, within a RU1 Primary Production zone.</li> <li>Substantial distances between the quarry and residences of neighbouring landholders.</li> </ul>																																																				
Economical	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	<p><b>Positive Impact</b></p> <p>Initially direct employment levels at the quarry are expected to be in the vicinity of one full time equivalent position, per 5,000 loose cubic metres (LCM) of annual production.</p> <p><b>Estimated full time equivalent employees (FTE).</b></p> <table border="1"> <thead> <tr> <th colspan="2">ANNUAL PRODUCTION</th> <th rowspan="2">QUARRY FTE</th> </tr> <tr> <th>LCM 3 m<sup>3</sup></th> <th>tonnes</th> </tr> </thead> <tbody> <tr> <td>1,000</td> <td>2,400</td> <td>0.2</td> </tr> <tr> <td>5,000</td> <td>12,000</td> <td>1</td> </tr> <tr> <td>10,000</td> <td>24,000</td> <td>2</td> </tr> <tr> <td>20,000</td> <td>48,000</td> <td>4</td> </tr> <tr> <td>29,000</td> <td>69,600</td> <td>5</td> </tr> </tbody> </table> <p><b>Estimated contractor days per annum.</b></p> <table border="1"> <thead> <tr> <th colspan="2">ANNUAL PRODUCTION</th> <th rowspan="2">PLANT MAINTENANCE</th> <th rowspan="2">EXPLOSIVES USE &amp; TRANSPORT</th> <th rowspan="2">CRUSHING &amp; SCREENING</th> <th rowspan="2">TOTAL</th> </tr> <tr> <th>3</th> <th>tonnes</th> </tr> </thead> <tbody> <tr> <td>1,000</td> <td>2,400</td> <td>4</td> <td>1</td> <td>1</td> <td>10</td> </tr> <tr> <td>5,000</td> <td>12,000</td> <td>8</td> <td>1.5</td> <td>5</td> <td>15</td> </tr> <tr> <td>10,000</td> <td>24,000</td> <td>1</td> <td>3</td> <td>1</td> <td>20</td> </tr> <tr> <td></td> <td></td> <td>2</td> <td></td> <td>0</td> <td>5</td> </tr> </tbody> </table>	ANNUAL PRODUCTION		QUARRY FTE	LCM 3 m <sup>3</sup>	tonnes	1,000	2,400	0.2	5,000	12,000	1	10,000	24,000	2	20,000	48,000	4	29,000	69,600	5	ANNUAL PRODUCTION		PLANT MAINTENANCE	EXPLOSIVES USE & TRANSPORT	CRUSHING & SCREENING	TOTAL	3	tonnes	1,000	2,400	4	1	1	10	5,000	12,000	8	1.5	5	15	10,000	24,000	1	3	1	20			2		0	5

		<p>A local quarry will substantially reduce freight costs, hence the overall cost of construction for any project requiring significant amounts of aggregate or road base. For example, transport costs for aggregate used to manufacture concrete at Walcha are expected to be reduced by more than 80%.</p>					
Siting & Configuration	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	<p>The proposal is consistent with NSW Department of Primary Industries recommended minimum buffer of 1,000m between extractive industries using blasting and neighbouring residences.</p>					
Setbacks	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>						
Privacy	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>						
Overshadowing	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>						
Solar Access	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>						
Visual	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	<p>The quarry is not visible from the Oxley Highway, nor is it visible from any nearby dwellings. When standing in the proposed quarry site, no dwellings can be seen.</p>					
Significant Views	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>						
Water	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	<p>Water will be used from the dams on Brooklyn for dust suppression. Significant groundwater flows area unlikely to be encountered by the quarry under typical operating conditions given that:</p> <ul style="list-style-type: none"> <li>• There are no nearby permanent watercourses, wetlands, springs or other features suggesting the presence of a near surface aquifer.</li> <li>• No rock units with significant porosity have been identified on or near the quarry site.</li> <li>• The quarry is located on the edge of an elevated ridge that forms part of the Great Dividing Range.</li> </ul> <p>A detailed Groundwater Impact Assessment, including the drilling of 5 bore holes, has been undertaken and is the subject of a detailed report.</p> <p><b>Ground Doctor Pty Ltd – Groundwater Impact Assessment – 11 August 2020</b></p> <p><b>5 Conclusion</b></p> <p>The proposed quarry will be excavated to a maximum depth of 1130 AHD. Groundwater was identified in basalt within the quarry footprint at a maximum elevation of approximately 1146m AHD. The proposed development would intersect the water table and is an aquifer interference activity as defined by the NSW Aquifer Interference Policy (2012).</p> <p>Ground Doctor assessed the site setting and available groundwater data to identify existing groundwater users, environmental receptors and culturally sensitive groundwater features within a 2km radius of the site.</p> <p>High priority groundwater dependent ecosystems or high priority cultural groundwater sites were not identified within 2km of the proposed quarry.</p> <p>Four existing groundwater works were identified within a 2km radius of the proposed quarry excavation. The identified bores were located more than 1500m from the proposed excavation. Available data for the identified bores indicated that standing water levels in the bores were at least 20m lower than the maximum proposed depth of excavation. The bore identified within "Mt Pleasant" was separated from the proposed quarry by the Great Dividing Range and was within a different catchment and a different groundwater management unit to the proposed quarry.</p>					

		<p>Five monitoring bores were installed within or close to the footprint of the proposed quarry excavation. Groundwater levels were measured at each bore. Falling head and rising head slug tests were performed on four of the five bores to assess hydraulic conductivity of aquifer material within and surrounding the proposed quarry excavation.</p> <p>A conceptual site model was developed based on available groundwater and topographical data. The proposed quarry excavation would be located approximately 200m south of the Great Dividing Range. The ground surface around the proposed quarry falls steeply to the south east, south and west. The surface elevation was more than 100m below the base of the proposed excavation less than 500m to the south east and south of the quarry. Groundwater elevation data showed a steep groundwater gradient to the south east, south and west of the proposed quarry, consistent with steeply sloping surface topography.</p> <p>An analytical model was adopted to predict steady state drawdown impacts and groundwater inflow to the open excavation at the completion of quarrying. The model predicted drawdown impacts would extend approximately 132m north of the proposed excavation. Groundwater inflow was estimated to be 1.16m<sup>3</sup>/day.</p> <p>Model prediction showed good agreement with observed real world drawdown in basalt within the quarry footprint, which was already draining to the south due to the presence of natural void (a deep valley) to the south.</p> <p>The modelled groundwater inflow to the excavation is less than the expected evaporation rate from the open excavation. There is also potential for any groundwater inflow to drain through the floor of the excavation, as the base of the proposed excavation remains elevated above the valley to the south. Mechanical dewatering of the excavation is unlikely to be required. Any water accumulation in the excavation could be used in quarry operations or used as stock water at the completion of the development.</p> <p>Direct take (eg: pumping for beneficial use) or indirect take of groundwater (eg: losses to evaporation) are required to be licenced. The annual groundwater inflow to the open excavation would be less than 2ML. The Applicant would need to source commercial use entitlement to take 2ML from the New England Fold Belt (Murray Darling Basin) groundwater management unit prior to intersecting the water table. The NSW Department of Industry Planning and Environment website (<a href="https://www.industry.nsw.gov.au/water/allocations-availability/water-accounting/usage-dashboard">https://www.industry.nsw.gov.au/water/allocations-availability/water-accounting/usage-dashboard</a> , 7 August 2020) indicates that there is 11384ML allocated within the New England Fold Belt (Murray Darling Basin) groundwater unit. It would be possible for the Applicants to obtain the required groundwater entitlement prior to intersecting the water table.</p> <p>The project involves blasting, crushing and screening of excavated rock. The proposed activities have little if any potential to add contaminants that could adversely change groundwater quality. Operation of plant and machinery and use of nitrogen containing explosives poses a similar risk to groundwater quality as existing agricultural use of the Site and adjoining land. Potential risks to water quality can be managed by implementing appropriate procedures for storage and use of chemicals, refuelling and maintenance of plant and machinery and implementing appropriate spill response plans.</p> <p>The information presented in this report indicates that the groundwater impacts associated with the proposed development would not exceed the Level 1 "minimum impact consideration" outlined in the NSW Aquifer Interference Policy (NSW DPI, 2012b). Therefore, groundwater impacts associated with the project are acceptable.</p>
Dust	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	NSW Health <a href="#">advice</a> indicates that the vast majority of dust from mining/quarry activities consists of coarse particles (around 40 per cent) and particles larger than PM10, generated from natural activities such

mechanical disturbance of rock and soil materials, for example by blasting, crushing and vehicles driving on dirt roads. Particles are also generated when wind blows over bare ground and different types of stockpiles. Larger particles can have amenity impacts as well as health impacts.

Fine particles from vehicle exhausts and mobile equipment are also produced at mine/quarry sites, though they only account for about 5 per cent of the particles emitted during the mining process. Fine particles are mainly from vehicle and mobile equipment exhausts.

It is expected that the primary sources of dust associated with the operation of the proposed quarry will be:

- Drilling rock.
- Blasting rock (see section 4.7 for more information).
- Crushing & screening rock.
- Transport trucks accessing the site.

Basalt will be the primary material being excavated, which is comparatively hard. There are no significant amounts of friable rock or earth present in the geological profile below about 2 metres.

To ensure worker safety a mixture of dust mitigation measures will be applied and amended in response to weather conditions, rock moisture content, plant location, etc. Those measures will be consistent with industry standards and include:

- Application of chemical surfactants.
- Enclosing conveyor transfer points.
- Implementation of water truck procedures.
- Installation of sprays at conveyor transfer points.
- Operator training and fit testing for respiratory protective equipment.
- Programmed maintenance of spray nozzles, pumps and plumbing.
- Regular inspections of operating dust controls.

The performance objective will be to ensure that:

- Quarry operations are conducted in accordance with the NSW Resource Regulator's 2020 workplace safety standards specified in the "Dust Safety in the Metals and Extractives Industries" document.
- No significant dust resulting from quarry operations is present more than 500 metres from the site boundary.

Trucks hauling quarry products via the access track within the property is a potential source of dust that could impact residents of the "Brooklyn" dwelling. The proposed track passes within 290m of the dwelling, hence it will need to be used and maintained in an appropriate manner to avoid impacts, especially in dry and windy conditions.

Strategies that will be used to minimise potential dust impacts associated with the quarry access track include:

- Constructing and maintaining the track with a firm all weather surface.
- Signposting and restricting quarry truck speeds to a maximum of 20km/h on the track.
- Mandatory site induction for all staff which highlights compulsory signposted speed limit for quarry site and access road.
- If the above measures become inadequate during dry and/or windy conditions, then additional strategies will be applied, including one or more of the following:
  - Reducing quarry truck speeds to a maximum of 10km/h
  - Using a water cart to suppress dust along sections of the track which may impact the "Brooklyn" dwelling or neighbours.

		<ul style="list-style-type: none"> <li>Applying a dust suppression coating to the track, such as a polymer or bitumen based emulsion.</li> </ul> <p>The performance objective will be to ensure that no significant dust resulting from quarry traffic is present more than 500 metres from the quarry access track, or on the site of any dwelling.</p>																																																						
Noise	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	<p><b>EPA Noise Policy</b></p> <p>Noise associated with new developments is regulated under the 'Noise Policy for Industry', published in 2017 by the NSW Environmental Protection Authority (NSW EPA). A key intent of the policy is to apply all feasible and reasonable measures to reduce predicted noise levels to the "project noise trigger levels" when predicted noise levels are above these levels.</p> <p>The "project noise trigger level" is the lower (most stringent) value of two different noise levels:</p> <ol style="list-style-type: none"> <li>An "intrusiveness noise level" which limits the extent to which a noise source can exceed the background level (that is, background plus 5 decibels [dB]) above a minimum threshold.</li> <li>A "project amenity noise level" provides an overall noise-level cap for different land uses.</li> </ol> <p>In this case the levels are:</p> <ol style="list-style-type: none"> <li>"Intrusiveness noise level" – Determined by rating background level (RBL) plus 5 dBA. The minimum RBL is 40 dBA during daylight hours in a RU1 Primary Production zones (Policy Table 2.1). The final intrusiveness noise level in this case is 45 dBA.</li> <li>"Noise amenity level" – During daylight hours is 50dBA when measured at an unrelated rural residential dwelling (Policy Table 2.2). Cumulative industrial noise is not relevant in this case as further industrial development is unlikely in the area.</li> </ol> <p>Ultimately the relevant "project noise trigger level" for this development, measured at unrelated rural dwellings, is the 45 dBA "Intrusiveness noise level".</p> <p>It is relevant to note the NSW EPA 'Noise Policy for Industry' states:</p> <p style="padding-left: 40px;">"The reaction to noise varies widely from individual to individual. Because of this, it is not possible to set noise levels that will guarantee no one will experience an impact.</p> <p>There will usually be some members of the community who find any noise unacceptable, regardless of whether it meets the project noise trigger level, and others who will not be bothered by noise even if it is above the project noise trigger level."</p> <p><b>Access</b></p> <p>At the peak level of quarry operations ..... Over an 8 hour day this will result in about 1 truck movement each 30 minutes and occasionally multiple vehicles would use the access at a similar time.</p> <p>Indicative maximum noise levels from single and multiple vehicles accessing the quarry are:</p> <p><b>Maximum expected vehicle noise from quarry access</b></p> <table border="1" data-bbox="549 1715 1374 2038"> <thead> <tr> <th>EQUIPMENT</th> <th>USING</th> <th>SWL (dB(A))</th> <th>LAeq</th> <th>SPL @7m (dB(A))</th> <th>SPL @ 300m L Aeq (15 min) (dB(A))</th> </tr> </thead> <tbody> <tr> <td rowspan="3">1 Truck (&gt;20 tonne)</td> <td></td> <td>1</td> <td></td> <td>8</td> <td>4</td> </tr> <tr> <td></td> <td>0</td> <td></td> <td>1</td> <td>0</td> </tr> <tr> <td></td> <td>6</td> <td></td> <td></td> <td></td> </tr> <tr> <td rowspan="3">1 Light vehicle (eg 4WD)</td> <td></td> <td>1</td> <td></td> <td>7</td> <td>3</td> </tr> <tr> <td></td> <td>0</td> <td></td> <td>8</td> <td>7</td> </tr> <tr> <td></td> <td>2</td> <td></td> <td></td> <td></td> </tr> <tr> <td rowspan="3">2 trucks &amp; 1 light vehicle</td> <td></td> <td>1</td> <td></td> <td>8</td> <td>4</td> </tr> <tr> <td></td> <td>1</td> <td></td> <td>2</td> <td>4</td> </tr> <tr> <td></td> <td>0</td> <td></td> <td></td> <td></td> </tr> </tbody> </table>	EQUIPMENT	USING	SWL (dB(A))	LAeq	SPL @7m (dB(A))	SPL @ 300m L Aeq (15 min) (dB(A))	1 Truck (>20 tonne)		1		8	4		0		1	0		6				1 Light vehicle (eg 4WD)		1		7	3		0		8	7		2				2 trucks & 1 light vehicle		1		8	4		1		2	4		0			
EQUIPMENT	USING	SWL (dB(A))	LAeq	SPL @7m (dB(A))	SPL @ 300m L Aeq (15 min) (dB(A))																																																			
1 Truck (>20 tonne)		1		8	4																																																			
		0		1	0																																																			
		6																																																						
1 Light vehicle (eg 4WD)		1		7	3																																																			
		0		8	7																																																			
		2																																																						
2 trucks & 1 light vehicle		1		8	4																																																			
		1		2	4																																																			
		0																																																						

For this development the "Project noise trigger level" measured at unrelated rural dwellings is 45 L Aeq (15 min) (dB(A))

As noted in section 2.6.1, 2011 NSW Roads and Maritime traffic volume data for the Oxley Highway indicates that there are about 105 truck movements per day in either direction. If the quarry reaches peak production levels, then there will be an average of about 15 additional truck movements per day along the highway, increasing truck movements by up to 14%.

Overall the available information indicates that transport activities associated with the quarry on the access road and highway are quite unlikely to substantially increase existing noise levels in the vicinity.

Strategies that will be used to minimise potential noise impacts from use of the quarry access track include:

- Only transporting quarry products during daylight hours.
- Signposting and restricting all quarry truck speeds to a maximum of 20km/h on the track.
- Ensuring a consistent moderate gradient on the access track and highway access point to minimise the potential need for the use of exhaust braking.

#### Quarry Machinery

Quarry machinery and related noise will primarily arise from excavation, crushing and screening activities.

#### Expected quarry machinery noise levels

An estimate of maximum quarry noise level over a 15 minute interval at dwellings in the vicinity has been prepared using the NSW RMS Construction and Noise Estimator Tool

#### Maximum quarry noise at dwellings

SCENARIO / LOCATION	DISTANCE metres	ATTENUATION dB(A)			SPL L Aeq (15 min)
		TYPE	LIKELY	APPLIED	
All quarry machinery listed in Table 12 operating simultaneously	7	Nil	Nil	Nil	102
"Brooklyn" dwelling	660	Ridge	5-10	Nil	50
"Yarooga Park" dwelling	>1,150	Ridge	5-10	Nil	43
"Mount Pleasant" dwelling	>1,500	Ridge & trees	5-10	Nil	
"Yarooga" dwelling	>1,700	Ridge & trees	>10	Nil	
Walcha Road village	2,200	Ridge & trees	>10	Nil	

The "Project noise trigger level" measured at unrelated rural dwellings is 45 L Aeq (15 min) (dB(A))

Based on the indicative modelling data within Tables 12 and 13, the "Intrusiveness Noise Level" specified by the NSW EPA will not be exceeded at any unrelated dwellings.

Furthermore, the modelled levels are likely to be significantly overestimated given that no provision was made for attenuation (reduction) of noise levels by land-form or vegetation. There is no line of sight between the quarry site and any dwellings, hence no direct path for sound to travel.

		<p>Noise associated with the operation of quarry machinery will be mitigated by:</p> <ul style="list-style-type: none"> <li>• Only using excavating and processing machinery during daylight hours, as outlined in Table 3.</li> <li>• Restricting days of operation, as noted previously in Table 3.</li> <li>• Ensuring all machinery is fitted and maintained with suitable mufflers.</li> </ul> <p>These strategies can be ensured by the use of conditioning in that the mitigation measures and recommendations as stated in the Statement of Environmental Effects are undertaken.</p>
Land Degradation	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	<p>Upon cessation of quarry operations the void will be rehabilitated to create a safe and stable landform consistent with the landowner's requirements. This is expected to involve one or more of the following strategies:</p> <ul style="list-style-type: none"> <li>• Pre-stripping and stockpiling top soil from the site. This soil will be used to facilitate re-vegetation of disturbed areas.</li> <li>• Battering the edges of the quarry void to reduce the slope of walls, either by excavation or by suitable placement of waste rock.</li> <li>• Ripping and/or applying a veneer of topsoil to any areas of compacted soil associated with the quarry void.</li> <li>• Using the quarry void to retain water for domestic livestock to drink from. This may require some earthworks to facilitate appropriate access paths and slopes.</li> <li>• Using appropriate earthworks to ensure surface water flows do not cause significant soil erosion after cessation of operations.</li> </ul>
Tree Loss	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	<p>The proposed development will not significantly remove, modify or fragment any established vegetation as:</p> <ul style="list-style-type: none"> <li>• No habitat of a threatened species or ecological community has been identified on the site or proposed access track.</li> <li>• Less than 0.5 hectare of scattered mature trees will be cleared from a highly disturbed area.</li> <li>• Existing isolated trees are quite vulnerable to dieback prompted by various factors including insect attack, mistletoe, ringbarking by livestock, wind, altered soil structure &amp; chemistry, etc.</li> <li>• No significant fragmentation or isolation will occur as a result of the proposed development.</li> </ul> <p>A review of the Areas of Outstanding Biodiversity Value (AOBV) <a href="#">Register</a> on 31 January 2020 showed four areas, none of which are located within 200km of the proposed development site. In that context the proposal is very unlikely to have any adverse effect, either directly or indirectly.</p> <p><b>Conclusion:</b> The proposed development or activity is unlikely to significantly affect any threatened species or ecological communities, or their habitats. In that context a biodiversity development assessment report is not warranted in this case.</p>
Flora	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	
Fauna	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	

Has a Threatened Species Impact Assessment been prepared? Yes  No

Are there any species/communities listed under the TSC Act? Yes  No

Are there any key threatening processes? Yes  No

**Comment:** Given the scale, type and context of the proposed development, it is unlikely to make any significant adverse environmental impact for a listed key threatening process.

THREATENING PROCESS	COMMENTS
Aggressive exclusion of birds from woodland & forest habitat by abundant Noisy Miners, Manorina melanoleuca	Development is unlikely to facilitate any significant opportunities for this species.
Anthropogenic Climate Change.	Currently all aggregate used in the Walcha Shire is transported via trucks from other local government areas. A new local aggregate source will substantially reduce diesel fuel consumption associated with aggregate consumption in the Walcha Shire. In these circumstances the development is expected to make a small reduction in carbon dioxide and other diesel exhaust pollutants within the Walcha Shire.
Bushrock removal (as described in the final determination of the Scientific Committee).	<p>"<b>Bushrock removal</b>" involves the disturbance and extraction of weathered outcrops of rock that provide habitat niches for animals. The listing does not apply to "the removal of rock from approved mining or quarrying activities".</p> <p>The impact on bushrock and associated species will not be significant as:</p> <ul style="list-style-type: none"> <li>• There is no scree, sheet like rock, or other rock formations likely to provide significant shelter niches for flora or fauna.</li> <li>• Basalt rock does outcrop and occur loose in the soil, but it lacks significant cracks, voids, slab like structures or scree formations that provide significant habitat niches for vertebrate animals.</li> <li>• No flora or fauna species listed in the final determination as threatened species which would be adversely affected by "bushrock removal" are known from the site.</li> </ul>
Clearing of native vegetation (as described in the final determination of the Scientific Committee).	Proposed development will remove about 12 mature Eucalyptus sp. trees in a highly disturbed habitat. Overall this is unlikely to significantly increase the extent or magnitude of the impact of this key threatening process.
Competition and grazing by the feral European Rabbit, Oryctolagus cuniculus.	Development is unlikely to facilitate any significant change in existing local population of this species.
Invasion of native plant communities by exotic perennial grasses.	Of the exotic perennial grass species listed in the declaration, serrated tussock (Nassella trichotoma) is the most significant one known to occur in the Northern Tablelands. Landholder advises that he is not aware of any occurrences of this species on "Brooklyn" or adjoining properties. The proposed development is not expected to facilitate the establishment or spread of any exotic perennial grasses.
Loss of hollow-bearing trees.	Development will remove about 12 mature Eucalyptus sp. trees in a highly disturbed habitat. Overall this is unlikely to significantly increase the extent or magnitude of this key threatening process.
Predation by the European Red Fox, Vulpes vulpes.	Development unlikely to facilitate predation by this species.
Predation by the Feral Cat Felis catus.	Development is unlikely to facilitate predation by this species.
Removal of dead wood and dead trees	Development will remove a small amount of dead wood and trees in a highly disturbed habitat. Overall this is unlikely to significantly increase the extent or magnitude of this key threatening process.

Does the proposed development require approval under the EPBC Act Yes  No

Heritage	Impact	Comment
European	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	
Aboriginal	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	An Aboriginal Heritage Information Management System (AHIMS) search was carried for the land including a 50metre buffer. No sites are recorded or places declared either on the land or within the 50 metre buffer. See Attachment.

- Is this land classified as containing an item of environmental heritage? Yes  No
- Is there an impact on and adjoining or in close vicinity to an item of environmental heritage? Yes  No
- Is this proposal in a heritage conservation Zone? Yes  No
- Is this proposal in an adjoining or in close vicinity to a conservation zone? Yes  No
- Has a Heritage Impact Statement been prepared for this proposal? Yes  No
- Has an Archaeological Survey been prepared for this proposal? Yes  No

### Flooding

*Section 4.15(1)(b) – EP & A Act*

- Is this property flood affected? Yes  No

### Bush Fire Prone Land

*Section 4.15(1)(b) – EP & A Act*

- Is this property bush fire prone as per the Bush Fire Prone Map? Yes  No
- Is this property bush fire prone as per any draft Bush Fire Prone Map? Yes  No
- Has a Bush Fire Management Plan been Prepared? Yes  No
- Does this development comply with Planning for Bushfire 2019? Yes  No

### Contaminated Land

*Section 4.15(1)(b) – EP & A Act*

- Has this land been identified as being contaminated land by Council? Yes  No
- Does this land require remediation? Yes  No
- Has a Contaminated Land Site Investigation been completed? Yes  No
- Is a referral required to NSW Environment Protections Authority? Yes  No
- Is it a possibility this land may be contaminated? Yes  No
- Is this land in the close vicinity or adjoining a known contaminated site? Yes  No

### Infrastructure

*Section 4.15(1)(b) – EP & A Act*

- Is an engineering assessment required? Yes  No
- Has an engineering assessment been completed? Yes  No

Who completed the Engineering Assessment?

Engineering Department  Assessing Officer  Other  Peter Murray

Does this proposal have any potential impact on:

	Impact	Comment
Sewer	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	
Water	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	
Drainage	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	<p>Minimal.</p> <p>Stormwater will be managed through out the site. This can be maintained by the use of appropriate conditioning.</p> <p><i>Surface water drainage from the site flows to the east and south into the Surveyors Creek catchment, then the MacDonaid River about 6.5km down slope of the site.</i></p> <p><i>The quarry access track through "Brooklyn" will be constructed from gravel and raised above natural ground level, hence there</i></p>

		<p><i>will be some change to natural stormwater flow paths.</i></p> <p><i>Table drains and culverts along the proposed access tracks will be used to direct stormwater flows into existing natural drainage hollows and existing dams on the "Brooklyn" holding.</i></p> <p><i>Diversion channels and/or earth bunds will be used to divert stormwater flows around the perimeter of the quarry into existing, and/or new, dams for domestic livestock. Stormwater redirection will be necessary to prevent the quarry void filling with water, as well as minimising potential soil erosion and sedimentation issues.</i></p> <p><i>Diversion channels and/or earth bunds will be used to divert stormwater flows around the perimeter of the quarry into existing, and/or new, dams for domestic livestock. Stormwater redirection will be necessary to prevent the quarry void filling with water, as well as minimising potential soil erosion and sedimentation issues.</i></p> <p><i>Key strategies that will be applied include ensuring that stormwater diversion channel:</i></p> <ul style="list-style-type: none"> <li>• <i>Beds are predominantly composed of bedrock, where feasible.</i></li> <li>• <i>Where bedrock is absent and the channel has a relatively high gradient, the bed and sides are lined with suitable rock.</i></li> <li>• <i>Flows into a dam, or existing gully with a natural base in bedrock.</i></li> </ul> <p><i>Stormwater within the quarry site may contain elevated levels of sediment derived from soil and aggregate stockpiles. No significant contaminants are known, or are likely, within the basalt rock or associated soils that will be disturbed by the quarry.</i></p> <p><i>All stormwater flows from the quarry site will directed to, and held within, a sump in the quarry floor. Sediment will be able to settle within the sump and the water used for dust suppression activities. The sump will be relocated within the site over time as quarry operations progress.</i></p>
Access	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	<p>See comments above from TfNSW. Engineering assessment agreed with TfNSW and incorporated wording as per their recommendation.</p> <p><u>Engineering Assessment</u></p> <p><i>The SEE further proposes that:</i></p> <ol style="list-style-type: none"> <li>1. <i>Existing access continues despite the limited site distance on Oxley Highway until the 5000m<sup>3</sup> threshold is reached.</i></li> <li>2. <i>The access is relocated to a location approximately 150m west of the existing within 6 months of achieving 5000m<sup>3</sup> of quarry sales. With regard the access standard, the SEE states: "separate letter and plans from Planit Consulting dated 24-7-2020 providing Turn Warrants Assessment and 2D concept drawing for proposed site access into the proposed Brooklyn Quarry off the Oxley Highway in response to Transport for NSW letter dated 26 May 2020" Whilst an email was received on 7/9/2020, the attachments were not downloaded when TRIM'ed and are no longer available</i></li> </ol> <p><i>However given that the SEE states that the "Visibility between this access and the highway is partially obscured by trees and the rising slope will impede trucks entering the highway" it is difficult to support the proposed staging concept given the additional truck movements generated.</i></p>

		<p>Consequently, I recommend the following conditions in addition to those detailed in the Transport for NSW letter dated 26 May 2020:</p> <ol style="list-style-type: none"> <li>1. Prior to quarry production commencing, a "Typical Rural Access Standards – Articulated Driveways" access is to be constructed at the location at approximately 150m west of the existing access.</li> <li>2. Within 6 months of the facility producing 5,000m<sup>3</sup> of quarry products from production commencing, the access is to be upgraded to a Basic Right Turn (BAR) intersection meeting AUSTROADS Part 4 of the Guide to Road Design (Austroads 2017a).</li> </ol>
Kerb & Gutter	Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>	
Upgrade Existing Road	Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>	See Comment Above

Does the development require any new easements? Yes  No

Has an Erosion and Soil Control Plan been submitted? Yes  No

**Comment:** This will be conditioned.

### Construction Assessment

Is a Construction Certificate Required? Yes  No

### Section 68 Assessment

Is a section 68 assessment required? Yes  No

Has a section 68 assessment been completed? Yes  No

Was a section 68 application submitted with this application? Yes  No

What is required? Onsite sewer management

Does this system require connection to a Council maintained system? Yes  No

### Developer Contributions

Does this proposal require any Developer Contribution? Yes  No

Is the contribution for a subdivision? Yes  No

Is the contribution for a special purpose relating only to this proposal? Yes  No

**Comment:** Traffic Generation on Oxley Highway and local road.

Contribution Plan	Levy	Rate (\$)	Comment
Not Applicable	Tonne or M <sup>3</sup>	\$0.20 Or \$0.60	This is contribution rate is applicable only to this development and is to be used for the maintenance of Oxley Highway and impacted local roads due to the increased traffic generation created by this development.

### Signage

- Does this proposal require signage? Yes  No
- Has this application included signage? Yes  No
- Should a restriction be placed on the amount/type of signage? Yes  No

**Comment:**

1. Business Identification Signage
2. Emergency Contact Signage
3. Truck Entering Signage

### Notification

- Does this application require notification/advertising? Yes  No
- Is this application an advertised development application under the EP & A Act? Yes  No
- Was this application notified/advertised as per the provisions of?  
 EP& A Act     LEP     CCP    Yes  No
- Was this application notified/advertised for public interest purposes only? Yes  No
- Dates Notification Undertaken    Commenced    2 April 2020    Finished    29 April 2020
- Were there any written submissions received? Yes  No
- If Yes, what was the number of submissions received? 4
- Did the applicant have the opportunity to respond to the issues raised within the submission/s? Yes  No

**Comment:** A modified Statement of Environmental Effects was submitted to Council which addressed the issues raised within the submissions.

<b>Submission Maker:</b>	<b>James Norton – Objection</b> Lessee of Property Known as Mt Pleasant
<b>Issue:</b>	Quarry will pose a risk of interference to the aquifer that supports the Mt Pleasant bore.
<b>Applicant Response:</b>	<p><i>The quarry will have a maximum depth of 30m and will expose layers (flows) of basalt, possibly with minor volcanic ash and agglomerate, as indicated in section 3.2. Significant groundwater flows area unlikely to be encountered by the quarry under typical operating conditions given that:</i></p> <ul style="list-style-type: none"> <li>• <i>There are no nearby permanent watercourses, wetlands, springs or other features suggesting the presence of a near surface aquifer.</i></li> <li>• <i>No rock units with significant porosity have been identified on or near the quarry site.</i></li> <li>• <i>The quarry is located on the edge of an elevated ridge that forms part of the Great Dividing Range.</i></li> </ul> <p><i>A detailed Groundwater Impact Assessment, including the drilling of 5 bore holes, has been undertaken and is the subject of a detailed report.</i></p> <p><b>Ground Doctor Pty Ltd – Groundwater Impact Assessment – 11 August 2020</b></p> <p><b>5 Conclusion</b></p> <p><i>The proposed quarry will be excavated to a maximum depth of 1130 AHD. Groundwater was identified in basalt within the quarry footprint at a maximum elevation of approximately 1146m AHD. The proposed development would intersect the water table and is an aquifer interference activity as defined by the</i></p>

*NSW Aquifer Interference Policy (2012).*

*Ground Doctor assessed the site setting and available groundwater data to identify existing groundwater users, environmental receptors and culturally sensitive groundwater features within a 2km radius of the site.*

*High priority groundwater dependent ecosystems or high priority cultural groundwater sites were not identified within 2km of the proposed quarry.*

*Four existing groundwater works were identified within a 2km radius of the proposed quarry excavation. The identified bores were located more than 1500m from the proposed excavation. Available data for the identified bores indicated that standing water levels in the bores were at least 20m lower than the maximum proposed depth of excavation. The bore identified within "Mt Pleasant" was separated from the proposed quarry by the Great Dividing Range and was within a different catchment and a different groundwater management unit to the proposed quarry.*

*Five monitoring bores were installed within or close to the footprint of the proposed quarry excavation. Groundwater levels were measured at each bore. Falling head and rising head slug tests were performed on four of the five bores to assess hydraulic conductivity of aquifer material within and surrounding the proposed quarry excavation.*

*A conceptual site model was developed based on available groundwater and topographical data. The proposed quarry excavation would be located approximately 200m south of the Great Dividing Range. The ground surface around the proposed quarry falls steeply to the south east, south and west. The surface elevation was more than 100m below the base of the proposed excavation less than 500m to the south east and south of the quarry. Groundwater elevation data showed a steep groundwater gradient to the south east, south and west of the proposed quarry, consistent with steeply sloping surface topography.*

*An analytical model was adopted to predict steady state drawdown impacts and groundwater inflow to the open excavation at the completion of quarrying. The model predicted drawdown impacts would extend approximately 132m north of the proposed excavation. Groundwater inflow was estimated to be 1.16m<sup>3</sup>/day.*

*Model prediction showed good agreement with observed real world drawdown in basalt within the quarry footprint, which was already draining to the south due to the presence of natural void (a deep valley) to the south.*

*The modelled groundwater inflow to the excavation is less than the expected evaporation rate from the open excavation. There is also potential for any groundwater inflow to drain through the floor of the excavation, as the base of the proposed excavation remains elevated above the valley to the south. Mechanical dewatering of the excavation is unlikely to be required. Any water accumulation in the excavation could be used in quarry operations or used as stock water at the completion of the development.*

*Direct take (eg: pumping for beneficial use) or indirect take of groundwater (eg: losses to evaporation) are required to be licenced. The annual groundwater inflow to the open excavation would be less than 2ML. The Applicant would need to source commercial use entitlement to take 2ML from the New England Fold Belt (Murray Darling Basin) groundwater management unit prior to intersecting the water table. The NSW Department of Industry Planning and Environment website (<https://www.industry.nsw.gov.au/water/allocations-availability/water-accounting/usage-dashboard> , 7 August 2020) indicates that there is 11384ML allocated within the New England Fold Belt (Murray Darling Basin) groundwater unit. It would be possible for the Applicants to obtain the required groundwater entitlement prior to intersecting the water table.*

*The project involves blasting, crushing and screening of excavated rock. The proposed activities have little if any potential to add contaminants that could adversely change groundwater quality. Operation of plant and machinery and use of nitrogen containing explosives poses a similar risk to groundwater quality as existing agricultural use of the Site and adjoining land. Potential risks to water quality can be managed by implementing appropriate procedures for storage and use of chemicals, refuelling and maintenance of plant and machinery and implementing appropriate spill response plans.*

	<i>The information presented in this report indicates that the groundwater impacts associated with the proposed development would not exceed the Level 1 “minimum impact consideration” outlined in the NSW Aquifer Interference Policy (NSW DPI, 2012b). Therefore, groundwater impacts associated with the project are acceptable.</i>
<b>Comment:</b>	To quantify this concern, Geological Survey of NSW – Mining, Exploration & Geoscience were asked to review the full application and submissions. Their response was: <i>GSNSW has reviewed the Statement of Environmental Effects for the above DA and have no issues or concerns to raise.</i> It is therefore assumed that the applicant has adequately addressed this matter.
<b>Submission Maker:</b>	<b>Janet Norton – Objection</b> Resides on Property Known as Mt Pleasant
<b>Issue:</b>	<b>Groundwater</b> <ul style="list-style-type: none"> <li>• SEE fails to address risk to water supplies</li> <li>• There is no hydrology report.</li> <li>• <i>No adequate consultation with local stakeholders in relation to the operation of the groundwater and aquifer systems in the area.</i></li> </ul>
<b>Comment:</b>	Please see applicant response and comment above for James Norton.
<b>Issue:</b>	<b>Soil Profiling</b> <i>No drilling had been undertaken to assess the actual depth and range of the basalt cap, nor the quality and usefulness of the resource.</i>
<b>Applicant Response:</b>	<i>Drilling and costeaming work combined with geological and geophysical observations indicate there is a profile of usable rock of more than 30 metres. Under ideal circumstances there may be up to about 450,000 cubic metres of rock that could be extracted.....</i> <i>Trenching and drilling of the quarry site has a generally shallow reddish clay soil immediately overlying relatively fresh (unweathered) Tertiary basalt, as represented in Figure 8 and Plate 3 below. Five drill holes were drilled during July 2020 at the locations shown Figure 7. They showed that the basalt is up to 37.0 metres (hole MB 1) in the immediate vicinity of the quarry site.</i> <i>All of the basalt is likely to be suitable for commercial use, unless there are significant geological variations. Known variations include some minor proportions of volcanoclastic/pyroclastic rocks (ash and agglomerate) exposed during test trenching and drilling.</i> <i>Drilling indicates there is a relatively persistent layer of clay underlying the basalt at about 1124m ASL on the quarry site. The clay typically shows a mottled colour and texture similar to highly weathered volcanoclastic rocks observed in excavator costeams. This clay layer is about 7m below the maximum depth of the proposed quarry.</i>
<b>Comment:</b>	To quantify this concern, Geological Survey of NSW – Mining, Exploration & Geoscience were asked to review the full application and submissions. Their response was: <i>GSNSW has reviewed the Statement of Environmental Effects for the above DA and have no issues or concerns to raise.</i> It is therefore assumed that the applicant has adequately addressed this matter.
<b>Issue:</b>	<b>Dust</b> <i>SEE has only assessed impacts of dust and noise using data taken from the Woolbrook weather station. The Woolbrook weather station is 7.4km west of the proposed quarry site and over 200m lower in elevation. This data does not describe the wind conditions at the proposed site, nor indicate the likely impact of dust and noise that would be produced by the quarry.</i>
<b>Applicant Response:</b>	<i>NSW Health advice indicates that the vast majority of dust from mining/quarry activities consists of coarse particles (around 40 per cent) and particles larger than</i>

PM10, generated from natural activities such as mechanical disturbance of rock and soil materials, for example by blasting, crushing and vehicles driving on dirt roads. Particles are also generated when wind blows over bare ground and different types of stockpiles. Larger particles can have amenity impacts as well as health impacts.

Fine particles from vehicle exhausts and mobile equipment are also produced at mine/quarry sites, though they only account for about 5 per cent of the particles emitted during the mining process. Fine particles are mainly from vehicle and mobile equipment exhausts.

It is expected that the primary sources of dust associated with the operation of the proposed quarry will be:

- Drilling rock.
- Blasting rock (see section 4.7 for more information).
- Crushing & screening rock.
- Transport trucks accessing the site.

Basalt will be the primary material being excavated, which is comparatively hard. There are no significant amounts of friable rock or earth present in the geological profile below about 2 metres.

To ensure worker safety a mixture of dust mitigation measures will be applied and amended in response to weather conditions, rock moisture content, plant location, etc. Those measures will be consistent with industry standards<sup>9</sup> and include:

- Application of chemical surfactants.
- Enclosing conveyor transfer points.
- Implementation of water truck procedures.
- Installation of sprays at conveyor transfer points.
- Operator training and fit testing for respiratory protective equipment.
- Programmed maintenance of spray nozzles, pumps and plumbing.
- Regular inspections of operating dust controls.

The performance objective will be to ensure that:

- Quarry operations are conducted in accordance with the NSW Resource Regulator's 2020 workplace safety standards specified in the "Dust Safety in the Metals and Extractives Industries" document.
- No significant dust resulting from quarry operations is present more than 500 metres from the site boundary.

Trucks hauling quarry products via the access track within the property is a potential source of dust that could impact residents of the "Brooklyn" dwelling. The proposed track passes within 290m of the dwelling, hence it will need to be used and maintained in an appropriate manner to avoid impacts, especially in dry and windy conditions.

Strategies that will be used to minimise potential dust impacts associated with the quarry access track include:

- Constructing and maintaining the track with a firm all weather surface.
- Signposting and restricting quarry truck speeds to a maximum of 20km/h on the track.
- Mandatory site induction for all staff which highlights compulsory signposted speed limit for quarry site and access road.
- If the above measures become inadequate during dry and/or windy conditions, then additional strategies will be applied, including one or more of the following:
  - Reducing quarry truck speeds to a maximum of 10km/h
  - Using a water cart to suppress dust along sections of the track which may impact the "Brooklyn" dwelling or neighbours.
- Applying a dust suppression coating to the track, such as a polymer or bitumen based emulsion.

The performance objective will be to ensure that no significant dust resulting from quarry traffic is present more than 500 metres from the quarry access track, or on the site of any dwelling.

<b>Comment:</b>	<p>To quantify this concern, Geological Survey of NSW – Mining, Exploration &amp; Geoscience were asked to review the full application and submissions. Their response was:</p> <p><i>GSNSW has reviewed the Statement of Environmental Effects for the above DA and have no issues or concerns to raise.</i></p> <p>It is therefore assumed that the applicant has adequately addressed this matter. These strategies can be ensured by the use of conditioning in that the mitigation measures and recommendations as stated in the Statement of Environmental Effects are undertaken.</p>																
<b>Issue:</b>	<p><b>Noise</b></p> <p><i>No reasonable attempt has been made in the SEE to determine the actual noise impact on my property and whether it could be reduced to an acceptable level.</i></p>																
<b>Applicant Response:</b>	<p><b>Access</b></p> <p><i>At the peak level of quarry operations ..... Over an 8 hour day this will result in about 1 truck movement each 30 minutes and occasionally multiple vehicles would use the access at a similar time.</i></p> <p><i>Indicative maximum noise levels from single and multiple vehicles accessing the quarry are:</i></p> <p><b>Maximum expected vehicle noise from quarry access</b></p> <table border="1" data-bbox="411 824 1233 1151"> <thead> <tr> <th data-bbox="419 831 571 943">EQUIPMENT G ACCESS</th> <th data-bbox="579 831 775 943">SWL LAeq (dB(A))</th> <th data-bbox="783 831 995 943">SPL @7m (dB(A))</th> <th data-bbox="1003 831 1225 943">SPL @ 300m L Aeq (15 min) (dB(A))</th> </tr> </thead> <tbody> <tr> <td data-bbox="419 954 571 1010">1 Truck (&gt;20 tonne)</td> <td data-bbox="579 954 775 1010">106</td> <td data-bbox="783 954 995 1010">81</td> <td data-bbox="1003 954 1225 1010">40</td> </tr> <tr> <td data-bbox="419 1021 571 1077">1 Light vehicle (eg 4WD)</td> <td data-bbox="579 1021 775 1077">103</td> <td data-bbox="783 1021 995 1077">78</td> <td data-bbox="1003 1021 1225 1077">37</td> </tr> <tr> <td data-bbox="419 1088 571 1144">2 trucks &amp; 1 light vehicle</td> <td data-bbox="579 1088 775 1144">110</td> <td data-bbox="783 1088 995 1144">82</td> <td data-bbox="1003 1088 1225 1144">44</td> </tr> </tbody> </table> <p data-bbox="419 1155 1233 1267"><i>For this development the "Project noise trigger level" measured at unrelated rural dwellings is 45 L Aeq (15 min) (dB(A))</i></p> <p><i>As noted in section 2.6.1, 2011 NSW Roads and Maritime traffic volume data for the Oxley Highway indicates that there are about 105 truck movements per day in either direction. If the quarry reaches peak production levels, then there will be an average of about 15 additional truck movements per day along the highway, increasing truck movements by up to 14%.</i></p> <p><i>Overall the available information indicates that transport activities associated with the quarry on the access road and highway are quite unlikely to substantially increase existing noise levels in the vicinity.</i></p> <p><i>Strategies that will be used to minimise potential noise impacts from use of the quarry access track include:</i></p> <ul data-bbox="419 1608 1351 1783" style="list-style-type: none"> <li><i>• Only transporting quarry products during daylight hours.</i></li> <li><i>• Signposting and restricting all quarry truck speeds to a maximum of 20km/h on the track.</i></li> <li><i>• Ensuring a consistent moderate gradient on the access track and highway access point to minimise the potential need for the use of exhaust braking.</i></li> </ul> <p><b>Quarry Machinery</b></p> <p><i>Quarry machinery and related noise will primarily arise from excavation, crushing and screening activities.</i></p> <p><b>Expected quarry machinery noise levels</b></p> <p><i>An estimate of maximum quarry noise level over a 15 minute interval at dwellings in the vicinity has been prepared using the NSW RMS Construction and Noise Estimator Tool</i></p>	EQUIPMENT G ACCESS	SWL LAeq (dB(A))	SPL @7m (dB(A))	SPL @ 300m L Aeq (15 min) (dB(A))	1 Truck (>20 tonne)	106	81	40	1 Light vehicle (eg 4WD)	103	78	37	2 trucks & 1 light vehicle	110	82	44
EQUIPMENT G ACCESS	SWL LAeq (dB(A))	SPL @7m (dB(A))	SPL @ 300m L Aeq (15 min) (dB(A))														
1 Truck (>20 tonne)	106	81	40														
1 Light vehicle (eg 4WD)	103	78	37														
2 trucks & 1 light vehicle	110	82	44														

**Maximum quarry noise at dwellings**

SCENARIO / LOCATION	DISTANCE metres	ATTENUATION dB(A)			SPL L Aeq (15 min) (dB(A))
		TYPE	LIKELY	APPLIED	
All quarry machinery listed in Table 12 operating simultaneously	7	Nil	Nil	Nil	102
"Brooklyn" dwelling	660	Ridge	5-10	Nil	50
"Yarooga Park" dwelling	>1,150	Ridge	5-10	Nil	43
"Mount Pleasant" dwelling	>1,500	Ridge & trees	5-10	Nil	39
"Yarooga" dwelling	>1,700	Ridge & trees	>10	Nil	37
Walcha Road village	2,200	Ridge & trees	>10	Nil	17

The "Project noise trigger level" measured at unrelated rural dwellings is 45 L Aeq (15 min) (dB(A))

Based on the indicative modelling data within Tables 12 and 13, the "Intrusiveness Noise Level" specified by the NSW EPA will not be exceeded at any unrelated dwellings.

Furthermore, the modelled levels are likely to be significantly overestimated given that no provision was made for attenuation (reduction) of noise levels by land-form or vegetation. There is no line of sight between the quarry site and any dwellings, hence no direct path for sound to travel.

Noise associated with the operation of quarry machinery will be mitigated by:

- Only using excavating and processing machinery during daylight hours, as outlined in Table 3.
- Restricting days of operation, as noted previously in Table 3.
- Ensuring all machinery is fitted and maintained with suitable mufflers.

**Comment:**

To quantify this concern, Geological Survey of NSW – Mining, Exploration & Geoscience were asked to review the full application and submissions. Their response was:  
*GSNSW has reviewed the Statement of Environmental Effects for the above DA and have no issues or concerns to raise.*  
 It is therefore assumed that the applicant has adequately addressed this matter. These strategies can be ensured by the use of conditioning in that the mitigation measures and recommendations as stated in the Statement of Environmental Effects are undertaken.

**Issue:**

**Traffic & Road Safety**

*The development and operation of the quarry poses road safety issues for both the community and road users generally.*

**Comment:**

Transport for NSW (TfNSW) was consulted and are a concurrence authority for this development. This is due to the land fronting and accessing off the Oxley Highway. A copy of their response is attached to this report.  
 TfNSW response to Council; in determining the application under the *Environmental Planning and Assessment Act 1979*, it is Council's responsibility to consider the environmental impacts of any road works which are ancillary to the development. This includes any works which form part of the proposal and/or any works which are deemed necessary to include as requirements in the conditions of project approval. They had no objection to the development with the following recommendations:  
 Council:

	<ul style="list-style-type: none"> <li>• should be satisfied that the application has sufficiently explained the impacts of the development and justified all proposed mitigation measures.</li> <li>• condition the maximum daily and hourly movements generated by the development.</li> <li>• request an assessment of turn treatment warrants in accordance with the Austroads Guide to Traffic Management Part 6 and Austroads Guide to Road Design Part 4A for the site access, identifying the existence of the minimum basic turn treatments and addressing the need for any warranted higher order treatments.</li> <li>• condition all redundant accesses to be legally and physically closed prior to commencement of use of the new access.</li> <li>• prior to determination have strategic (2D) design drawings of all proposed improvements to public roads and the site access to mitigate the traffic and road safety impacts of the development.</li> <li>• condition that a Traffic Management Plan (TMP) be developed addressing the construction, operation and decommission phases of the proposed development.</li> <li>• consider the need for any regulatory signage (truck turning signs) and where necessary seek the endorsement of the Local Traffic Committee prior to Council approval the signage.</li> <li>• any future roadwork on the classified (State) road will need to be designed and constructed in accordance with the current Austroads Guidelines, Australian Standards and TfNSW Supplements. The developer will be required to enter into a Works Authorisation Deed (WAD) with TfNSW for any roadwork deemed necessary on the classified (State) road. The developer will be responsible for all costs associated with the roadwork and administration for the WAD.</li> </ul> <p>The above response was forwarded onto the developer who included additional information to address these issues in the revised Statement of Environmental Effects. Further the Engineering Assessment addressed these recommendations and the recommended conditions of development consent addressing these issues.</p>
--	---

<b>Submission Maker:</b>	<b>Danielle Norton &amp; Paul Chevrot – Objection</b> Owners of Property Known as Mt Pleasant
<b>Issue:</b>	<b>Groundwater</b> The potential impacts the proposed development could have on the aquifers in the region.
<b>Comment:</b>	Please see applicant response and comment above for James Norton.
<b>Issue:</b>	<b>Dust and Noise</b> <i>The SEE only briefly assessed the potential impacts of dust and noise using data taken from the Woolbrook weather station, a station that is 7.4km west of the proposed quarry site and over 200m lower in elevation. This data does not describe the wind conditions at the proposed site, nor does it indicate the likely impact of dust and noise that would be produced by the quarry. Any conclusions drawn from this data are therefore insufficient.</i>
<b>Comment:</b>	See applicant response and comment above for Janet Norton.
<b>Issue:</b>	<b>Project Duration and Size of Development</b> <i>The potential impacts of this proposed quarry development are unable to be assessed due to insufficient detail in relation to project duration (no end date), and size of development (depth of quarry, volume of aggregate to be extracted, and frequency of blasting etc).</i>
<b>Applicant Response:</b>	See applicant response on soil profiling above for Janet Norton. <b>Project Duration</b> <i>A specific end date for the operation of the quarry has not been proposed because:</i> <ul style="list-style-type: none"> <li>• <i>Rural quarries tend to have highly variable and sporadic rates of extraction.</i></li> </ul>

	<ul style="list-style-type: none"> <li>The actual end date will depend upon the rate of extraction of gravel/aggregate, which will vary from year to year, depending on demand.</li> </ul>
<b>Comment:</b>	Size of Development - Please see comment on soil profiling above for Janet Norton. Project Duration – This is normal practice for the majority of quarries.
<b>Issue:</b>	<p><b>Vague and Conceptual Information</b></p> <p><i>The limited information provided in the SEE is vague and 'conceptual' (using "ideal" and best-case scenarios etc) which results in uncertainty as to what would actually come to pass (including the impact on our ground water and the noise and dust levels etc) should the quarry be allowed to be developed.</i></p>
<b>Comment:</b>	The applicant was given the opportunity to address the issues contained within the submissions. This resulted in an expanded Statement of Environmental Effects.
<b>Issue:</b>	<p><b>Impact on Proposed Future Development</b></p> <p><i>Have plans to further develop the business on the farm, all while respecting the food and fibre history of land use in the area. This may include truffle orchards, grass fed pork, beekeeping, native tree plantations and foliage business, or wool fibre/yarn production (or a combination of these). We are looking at a few possibilities but all these future plans are dependent on our secure and reliable aquifer fed bore watering system, and a dust free environment. Our plans also include on farm agritourism and/or eco-tourism...which I would hope could deliver benefits to the community with potential employment opportunities and additional tourism in the district. We fear that regular blasting and possible dust/noise pollution from a quarry are not favourable to developing a successful agritourism/eco-tourism business.</i></p>
<b>Comment:</b>	This cannot be considered as part of this assessment. Development needs to be considered at the time of submission, and this is permissible development. If the developments as stated had been submitted and approved, the impact on that development could be assessed. Assessment cannot be made on proposed future development.
<b>Issue:</b>	<p><b>Rural Land Character Conflict</b></p> <p><i>It is in conflict with the rural character of the land in the district.</i></p>
<b>Applicant Response:</b>	<p><b>APPENDIX A – Land Use Conflict Risk Assessment</b></p> <p><i>The aim of this Land Use Conflict Risk Assessment (LUCRA) is to identify and assess the potential for land use conflict issues and risk of occurrence before a proposed change in land use proceeds and disputes arise.</i></p> <p><b>LUCRA Process</b></p> <p><i>The approach taken in this LUCRA is based on the NSW DPI Land Use Conflict Risk Assessment Guide published in October 2011. This involved:</i></p> <ul style="list-style-type: none"> <li><i>gathering information about the site and locality;</i></li> <li><i>undertaking a site inspection;</i></li> <li><i>talking to neighbouring landholders within 1.5 kilometres of the proposed development site;</i></li> <li><i>undertaking a land use conflict risk assessment; and</i></li> <li><i>documenting strategies to reduce the risk or consequence of any conflicts.</i></li> </ul> <p><b>Recommended risk reduction strategies &amp; performance targets</b></p> <p><i>In Table A3, a range of recommended management strategies and performance targets for the operation of the proposed Brooklyn Quarry are provided. These strategies are regarded as the most relevant to avoiding potential conflicts with neighbours and the public. Additional mitigation strategies are outlined in the section titled "4. Environmental Impact Mitigation" within the SEE.</i></p>

**Table A3 – Recommended risk reduction strategies & performance targets.**

POTENTIAL CONFLICT	MANAGEMENT STRATEGIES	REVISED RISK RANKING	PERFORMANCE TARGET
Noise from blasting	Do not blast during early morning, dusk or during temperature inversions. Ensure adequate depth & type of stemming in blast drill holes. Dampening site to reduce dust, if dust issues arise.	(D 4) 5	No complaints to quarry operator, Council or Mines Inspectorate.
Dust from blasting		(D 4) 5	
Ground vibration from blasting		(D 4) 5	
Flyrock from blasting	Provide "Highvale" property owner/manager with ≥ 48 hours notice of intended blasting dates and times. No blasting undertaken if any non-quarry person is present with a 500 metre radius of site.	(C 4) 8	
Noise from excavation	Excavation only undertaken during daylight hours.	(D 4) 5	No complaints to quarry operator or Council
Dust from excavation	Dampening site to reduce dust, if issues arise.	(D 4) 5	
Noise from transport	Haulage only undertaken during daylight hours.	(D 4) 5	
Dust from transport	Dampening access road, if dust issues arise.	(D 4) 5	
Traffic from transport	Ensure quarry related trucks are not over loaded or driven at excessive speed when entering the Oxley Highway. Maintain access drive way linking the Oxley Highway to the "Brooklyn" property with a firm all weather surface at same height as the highway. Install & maintain quarry related signage requested by Council along the verge of the Oxley Highway.	(C 4) 8	No complaints to quarry operator, Council or NSW Roads & Maritime Services

The table titled "Potential conflict risk ranking for proposed Brooklyn Quarry" (Table A2) provides a structured assessment of the most likely conflict risks associated with the quarry operation.

The documented risks are typical for this type of development and can be managed by a competent quarry manager and shotfirer via the strategies listed in the table titled "Recommended risk reduction strategies & performance targets" (Table A3). In the event that they are not appropriately managed, various administrative and enforcement mechanisms are available to government authorities.

<b>Comment:</b>	There will be no land use conflict if the strategies as listed in the SEE and relevant legislation are followed throughout the operation of the development. This will be conditioned.
<b>Issue:</b>	<b>Future Health Concerns</b> Concerned for the health of the current and future occupants of the Mt Pleasant residents should this quarry development go ahead.
<b>Comment:</b>	This is a personal and emotive comment. It cannot be taken into consideration as it lacks a linkage to a planning merit that can be considered as part of this assessment.
<b>Submission Maker:</b>	<b>Alpha Omega Town Planning - Objection</b> Consultant to Owners and Occupiers of Property Known as Mt Pleasant
<b>Issue:</b>	<b>Aquifer Impact</b> The potential impact of the proposed quarry on local aquifers, and the potential for

	<p><i>this to have material adverse impacts on the reliable bore water that has continued to deliver good quality stock and domestic water to our clients' property (even during the drought) and adjacent properties in the locality.....</i></p> <p><b>Lack of test data for Aquifers</b></p> <p><i>Of perhaps most concern in this proposal, is the absence of any substantive test data on the presence (or otherwise) of aquifer(s) that could be at risk from the proposed quarrying operations.....it fails to provide any adequate assessment of the groundwater and likely impacts associated with the proposal'.</i></p>
<b>Comment:</b>	See applicant response and comment above for James Norton.
<b>Issue:</b>	<p><b>DA should be refused</b></p> <p><i>The DA should be refused for the following key reasons:</i></p> <p>a) <i>the proposed quarry will give rise to unacceptable adverse groundwater impacts, dust impacts, noise impacts and traffic safety impacts;</i></p> <p>b) <i>the proposed quarry is not in the public interest;</i></p> <p>c) <i>the DA is 'designated development' under the Environmental Planning and Assessment Act 1979 (EP&amp;A Act);</i></p> <p>d) <i>the DA contains insufficient information in relation to:</i></p> <p>i. <i>extraction rates and area – there is uncertainty in relation to the maximum</i></p> <p>ii. <i>depth of the quarry and the lifespan of the quarry;</i></p> <p>iii. <i>justification of the need for the proposed quarry – including the size and quality of the basalt resource, market demand and alternative sites analysis;</i></p> <p>iv. <i>quantitative and qualitative impacts of groundwater impacts, dust impacts, noise impacts and traffic safety impacts; and</i></p> <p>v. <i>(iv) social and economic impacts in the locality.</i></p>
<b>Applicant Response:</b>	<p>a) Please see applicant response above for James Norton.</p> <p>b) Public interest</p> <p><i>This proposal has been developed on the basis that it should comply with all current land use planning standards and have no significant adverse impact on neighbours, the public, the environment or public infrastructure. Mitigation measures have been also been proposed that are appropriate for the scale of the quarry and the context in which it will be located.</i></p> <p><i>The proponents believe that it is in the public interest that this development should proceed, given that it:</i></p> <ul style="list-style-type: none"> <li>• <i>Creates economic diversity via the establishment of a new extractive industry.</i></li> <li>• <i>Will reduce construction costs for local roads, buildings and infrastructure by enabling a local source of aggregate supply.</i></li> <li>• <i>Diversifies local employment opportunities.</i></li> <li>• <i>Creates additional local jobs.</i></li> <li>• <i>Reduces truck traffic on highways and regional roads to source aggregate and quarry products from elsewhere.</i></li> <li>• <i>It is quite unlikely to have any significant adverse impacts on the environment, neighbours, community or public infrastructure.</i></li> </ul> <p>c) designated development – SEE has shown that it will not exceed any local development standard that will turn the development into designated development.</p> <p>d) modified the SEE to ensure these issues were addressed.</p>
<b>Comment:</b>	<p>a) See applicant comment above for James Norton.</p> <p>b) The public interest is adequately dealt with by the applicant.</p> <p>c) This development is not designated development.</p> <p>d) There is enough information in the SEE to assess the application.</p>
<b>Issue:</b>	<p><b>Lack of Detail to SEE to determine resource</b></p> <p><i>Lack of geological investigations at the site and inadequate information provided by the Applicant on both the quantity of the purported basalt deposits as well as its quality.....the SEE does not sufficiently detail the quantity and quality of the</i></p>

	<i>proposed resource in light of its proposed end-use..... ambiguity in the SEE regarding the amount of cubic meters to be extracted further highlights the uncertainty as to the impacts of the proposal and the measures that would be required to mitigate such impacts.</i>																	
<b>Comment:</b>	Size of Development - See applicant response and comment on soil profiling above for Janet Norton.																	
<b>Issue:</b>	<p><b>Noise</b></p> <p><i>The proposed quarry is at a relatively high altitude, and at least one nearby property, Mount Pleasant, has no landforms (hills) between it and the proposed site to attenuate noise. The frequency and extent of extraction measures would therefore greatly influence the noise impacts associated with the proposal.....No technical assessments as to likely noise levels at different receptor points have been provided in the proposal – such information will need to be provided in order for Council to undertake a proper assessment of the noise impacts of the proposal.</i></p>																	
<b>Comment:</b>	See applicant response and comment above for Janet Norton.																	
<b>Issue:</b>	<p><b>Traffic safety and Consultation with TfNSW</b></p> <p><i>The SEE suggests that certain road safety upgrades will only occur once the quarry is economically viable (that exceeds 100,000 cubic metres). This approach to traffic safety impacts is not acceptable for a quarry.....No adequate traffic safety analysis has been carried out by the applicant.....Additionally, the Applicant has not undertaken any traffic surveys or provided a proposed traffic management plan, which would be necessary for a development of this nature. No consultation has been carried out with RMS even though the access road is a main road.....</i></p>																	
<b>Comment:</b>	Transport for NSW (TfNSW) was consulted and are a concurrence authority for this development. This is due to the land fronting and accessing off the Oxley Highway. A copy of their response is attached to this report. See applicant response and comment above for Janet Norton.																	
<b>Issue:</b>	<p><b>Lack of social and economic benefits</b></p> <p><i>The SEE's analysis of this issue is limited to referring to potential social and economic benefits – which are not supported by any empirical analysis of the quality of the resource or market demand in the area.....There is no attempt by the SEE to consider potential adverse social and economic impacts in the locality that may arise from the proposed quarry such as, among other matters, sterilisation of agricultural land or impacts to existing and likely future land uses in the vicinity of the Development Site.</i></p>																	
<b>Applicant Response:</b>	<p><b>Social Impact</b></p> <p><i>No significant negative social impacts are expected given the:</i></p> <ul style="list-style-type: none"> <li>• <i>Rural setting of the quarry, within a RU1 Primary Production zone.</i></li> <li>• <i>Substantial distances between the quarry and residences of neighbouring landholders.</i></li> </ul> <p><b>Economical Impact</b></p> <p><i>Initially direct employment levels at the quarry are expected to be in the vicinity of one full time equivalent position, per 5,000 loose cubic metres (LCM) of annual production.</i></p> <p><b>Estimated full time equivalent employees (FTE).</b></p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th colspan="2">ANNUAL PRODUCTION</th> <th rowspan="2">QUARRY FTE</th> </tr> <tr> <th>LCM (m<sup>3</sup>)</th> <th>tonnes</th> </tr> </thead> <tbody> <tr> <td>1,000</td> <td>2,400</td> <td>0.2</td> </tr> <tr> <td>5,000</td> <td>12,000</td> <td>1</td> </tr> <tr> <td>10,000</td> <td>24,000</td> <td>2</td> </tr> <tr> <td>20,000</td> <td>48,000</td> <td>4</td> </tr> </tbody> </table>	ANNUAL PRODUCTION		QUARRY FTE	LCM (m <sup>3</sup> )	tonnes	1,000	2,400	0.2	5,000	12,000	1	10,000	24,000	2	20,000	48,000	4
ANNUAL PRODUCTION		QUARRY FTE																
LCM (m <sup>3</sup> )	tonnes																	
1,000	2,400	0.2																
5,000	12,000	1																
10,000	24,000	2																
20,000	48,000	4																

29,000	69,600	5
--------	--------	---

**Estimated contractor days per annum.**

ANNUAL PRODUCTION		PLANT MAINTENANCE	EXPLOSIVES USE & TRANSPORT	CRUSHING & SCREENING	TOTAL
3	tonnes				
1,000	2,400	4	1	1	10
5,000	12,000	8	1.5	5	15
10,000	24,000	12	3	10	25
20,000	48,000	16	6	20	42
29,000	69,600	20	9	30	59

A local quarry will substantially reduce freight costs, hence the overall cost of construction for any project requiring significant amounts of aggregate or road base. For example, transport costs for aggregate used to manufacture concrete at Walcha are expected to be reduced by more than 80%.

<b>Comment:</b>	The applicant has adequately addressed both issues.
<b>Issue:</b>	<p><b>Lifespan of Project</b></p> <p>The SEE provides no comfort about the lifespan of the proposed quarry and notes that extraction rates are likely to be highly variable..... There is no consideration of the potential adverse impacts of the sterilisation of the agricultural use of the land, or adverse impacts to adjacent agricultural uses.</p>
<b>Comment:</b>	See applicant response and comment above for Norton & Chevrot.
<b>Issue:</b>	<p><b>Alternative Sites</b></p> <p>The SEE's assessment of alternative sites is materially deficient. It is limited to a consideration of alternative sites within the "Brooklyn" property only. A proper assessment of alternative sites should not be limited in this manner for the purposes of the EP&amp;A Act. There is no consideration of alternative sites within the locality, or analysis of the 'do nothing' scenario.</p>
<b>Applicant Response:</b>	<p>Several alternative sites were considered on the "Brooklyn" property but were rejected for one or more of the following reasons.</p> <ul style="list-style-type: none"> <li>• <b>Resource deficiency</b> - A significant volume of rock (ie &gt;250,000 cubic metres) with suitable engineering properties is required to enable the establishment of a viable aggregate quarry. Geological and geophysical observations indicate that other parts of the "Brooklyn" property lack sufficient volumes of suitable rock.</li> <li>• <b>Higher environmental values</b> - Parts of the property with relatively intact vegetation communities and higher vegetation density have been avoided as they have more significant environmental values.</li> <li>• <b>Topography</b> - Establishing, operating and rehabilitating a quarry is typically more cost effective on the side of a ridge or hill. Other parts of the "Brooklyn" property were considered and discarded on the basis that they had minimal or excessive slope.</li> </ul> <p>Consideration was given to establishing a quarry at various other sites within the Shire, but they were rejected for one or more reasons, including:</p> <ul style="list-style-type: none"> <li>• There were unrelated dwellings within 1 kilometre.</li> <li>• A lack of reasonable proximity to Walcha township.</li> <li>• No evidence of a significant volume of basalt rock.</li> <li>• Likely access problems including public roads in poor condition and/or located a significant distance from a public road.</li> <li>• Higher environmental values with significant stands of native vegetation, rock outcrops or other factors.</li> </ul> <p>A "do nothing" scenario involves the quarry not proceeding which would involve</p>

	<p>various "opportunity costs", including losing a chance to:</p> <ul style="list-style-type: none"> <li>• Increase economic diversity via the establishment of a new extractive industry.</li> <li>• Reduce construction costs for local roads, buildings and infrastructure by enabling a local source of aggregate supply.</li> <li>• Diversify local employment opportunities.</li> <li>• Create new local jobs.</li> <li>• Enable a relatively isolated extractive industry proposal to proceed within a setting where it is quite unlikely to have any significant adverse impacts on the environment, neighbours, community or public infrastructure.</li> </ul>
<b>Comment:</b>	The applicant has provided a comprehensive reply which addresses this issue.
<b>Issue:</b>	<p><b>Weather Data Location</b></p> <p>Observations for wind speed and direction are provided from the Woolbrook weather station approximately 7km away.</p>
<b>Comment:</b>	All weather data has been taken from the nearest weather station. It is considered that this location is adequate for this assessment.
<b>Issue:</b>	<p><b>Dust</b></p> <p>There is potential for dust to adversely affect our clients' property because Mt Pleasant is located east by north east of the proposed quarry at a distance of around 1,500 metres. The Applicant has undertaken no adequate quantitative or qualitative analysis of dust impacts.....</p> <p>A new unsealed access road is proposed for hauling from the extraction site to the access road (Oxley Highway). It is proposed to employ four limited strategies to reduce dust generation including the use of a water cart during dry and windy conditions. However, higher traffic volumes during such conditions could generate quite a lot of dust and, as we have seen during recent drought conditions, water sources can be compromised such that no water is available for such purposes. This could lead to significant dust plumes being created and transported during dry and windy weather.</p>
<b>Comment:</b>	See applicant response and comment above for Janet Norton.
<b>Issue:</b>	<p><b>Noise</b></p> <p>No attempt has been in the SEE at undertaking quantitative or qualitative assessment of the likely noise impacts. Blasting and the use of rock crushing/processing equipment will generate significant noise.</p>
<b>Comment:</b>	See applicant response and comment above for James Norton.
<b>Issue:</b>	<p><b>Consultation</b></p> <p>No meaningful consultation with our client has occurred.</p>
<b>Comment:</b>	<p>The applicant is not legislatively required to consult with neighbours. Council did undertake neighbour notification as per the Walcha CPP and extended the time period for submissions as requested by this submission writer and Janet Norton.</p> <p>"Meaningful consultation" with neighbours does not mean they have to give their permission for the development.</p>
<b>Issue:</b>	<p><b>Mining SEPP 2007 Assessment</b></p> <p>No adequate assessment of impact on land uses has been undertaken for the purposes of the Mining SEPP 2007.....is materially deficient for the following key reasons:</p> <ul style="list-style-type: none"> <li>• it fails to identify: <ol style="list-style-type: none"> <li>1. existing, approved and likely preferred land uses in the vicinity;</li> <li>2. whether or not the development is likely to have a significant impact on the uses that, in the opinion of the consent authority having regard to land use trends, are likely to be the preferred uses of land in the vicinity of the development;</li> <li>3. any ways in which the development may be incompatible with any of those existing, approved or likely preferred uses;</li> </ol> </li> <li>• fails to evaluate and compare the respective public benefits of the development</li> </ul>

	<p>and the land uses referred to above; and</p> <ul style="list-style-type: none"> <li>• fails to put forward and evaluate any measures proposed to avoid or minimise any incompatibility.</li> </ul>
<b>Comment:</b>	Adequate assessment has been undertaken throughout the SEE.
<b>Issue:</b>	<p><b>Legal Advice Sought</b></p> <p>Have sought legal advice form Gilbert + Tobin Lawyers with respect to the proposed quarry. The advice provided has raised 2 key legal issues of concern for Council in its assessment.</p>
<b>Issue:</b>	<p><b>DA not Designated Development</b></p> <p>That the DA is not a form of 'designated development' for the purpose of the EP&amp;A Act and the Environmental Planning and Assessment Regulation 2000 (EP&amp;A Regulation).</p>
<b>Issue:</b>	<p><b>Application fails to provide sufficient information</b></p> <p>Gilbert + Tobin have separately advised that the development application, as currently put to Council, fails to provide sufficient information on the nature of the proposed quarry and associated impacts..... Specifically, the proposal as detailed in the SEE fails to provide sufficient information on how the proposal will operate, and associated impacts, relating to:</p> <ul style="list-style-type: none"> <li>• the quality and quantity of the basalt resource proposed to be extracted;</li> <li>• extraction methods and processing;</li> <li>• traffic;</li> <li>• dust emissions;</li> <li>• groundwater; and</li> <li>• noise.</li> </ul>
<b>Comment:</b>	The applicant has provided a comprehensive reply which addresses all issues as raised within the submissions, and has provided adequate information for an appropriate level of assessment to be undertaken.

<b>Submission Maker:</b>	<b>Strathleigh Grazing Pty Ltd – Support</b>
<b>Issue:</b>	Both Directors (Nathan Gilbody and John Boughton) have are in agreement with the information as provided by the applicant and support the development.

**Section 88b Instrument**

Does Council require a Section 88b instrument to be prepared? Yes  No

**Public Interest**

Does this proposal have any construction or safety issues? Yes  No

Is there any public health issues? Yes  No

Are there any other public interest issues? Yes  No

**Site Suitability**  
*Section 4.15(1)(c) – EP & A Act*

Is this a suitable site for this development? Yes  No

**Assessing Officer General Comment**

**Comment:** There are no outstanding issues that cannot be dealt with by the use of appropriate conditioning.

**Recommendation**

This development application be approved subject to the following conditions:

**RELEVANT PRESCRIBED CONDITIONS**  
(under the Environmental Planning and Assessment Regulation 2000)

Nil

**GENERAL CONDITIONS**

1. The development shall be implemented in accordance with:
  - (a) All documentation and correspondence submitted by the applicant, or their agents, in support of the Development Application,
  - (b) the details set out on the plans approved and stamped by authorised officers of Council, except as amended by the conditions of this development consent.

**Note:** Any proposal to modify the terms or conditions of this consent, whilst still maintaining substantially the same development to that approved, will require the submission of a formal application under Section 4.55 of the Environmental Planning and Assessment Act 1979 for Council's consideration. If amendments to the design result in the development not remaining substantially the same as that approved by this consent, a new development Application will have to be submitted to Council.
2. A copy of all stamped approved plans, specifications and documents must be kept on site at all times so as to be readily available for perusal by any officer of Council or the Principal Certifying Authority.
3. All management recommendations contained within the Statement of Environmental Effects by Matthew Goodwin, Version 1.2 dated August 2020 are to be complied with.
4. Annual production from the quarry is not to exceed 29,000m<sup>3</sup> per year of extractive materials. Any increase in production or alteration to operations is to be the subject of a further Development Application.
5. The total surface area of the quarry shall not exceed 2 hectares of land including clearing or excavating, roads; or storing or depositing overburden, extractive materials or tailings.
6. A contribution is to be paid to Council on a quarterly basis and will be subject to annual CPI adjustment. This is calculated at \$0.20 per tonne or \$0.60 per m<sup>3</sup> of gravelled hauled from site. The proponent is responsible for the provision of an annual audited Statement of Compliance from a qualified auditor.
7. The applicant must keep a legible record of all complaints made to the developer or any employee or agent of the developer in relation to dust or any activity to which this development consent relates. The record must include details of the following:
  - a) the date and time of the complaint;
  - b) the method by which the complaint was made;
  - c) any personal details of the complainant which were provided by the complainant or, if no such details were provided, a note to that effect;
  - d) the nature of the complaint;
  - e) the action taken by the developer in relation to the complaint, including any follow-up contact with the complainant; and
  - f) if no action was taken by the quarry operator, the reasons why no action was taken.

The record of a complaint must be kept for at least three (3) years after the complaint was made. Records of complaints must be produced on demand to authorised officers of Council or State Government authorities.
8. The use and occupation of the site, including that of construction plant and equipment being installed thereon, shall not give rise to any offensive noise or vibration within the meaning of the *Protection of the Environment Operations Act, 1997*.
9. The rehabilitation of the site will be as per the approved rehabilitation plan including:
  - a) No external material will be brought to site for rehabilitation.
  - b) Topsoil will be stored within the bounds of the development and managed to maintain quarry hygiene with regard to environmental weed species.
10. The applicant is to prepare a Quarry Management Plan for the site to summarise NSW Government legislative requirements, guidelines, and the conditions of this development consent. The Quarry Management Plan shall identify operational requirements relating to matters such as noise, water and erosion, air quality, vibration, access, traffic, transport, bushfires, hazardous

materials, noxious weeds, rehabilitation, land care, community relations, monitoring and auditing, and waste; including measures to mitigate any adverse impacts to the environment, nearby residents and road users. This plan is to be available upon request of Council, and any other relevant state agency.

11. All erosion and sediment controls are to be designed and implemented in accordance with the publication *Managing Urban Stormwater, Soils and Construction, Volume 2E Mines and Quarries* published by the NSW Department of Environment and Climate Change in 2008.
12. Compliance with all requirements of the SafeWork NSW in relation to the transport, storage and handling of dangerous goods associated with the development is to be undertaken.
13. Compliance in relation to the *National Parks and Wildlife Act, 1974* with regard to Aboriginal relics is to be ensured at all times.
14. If any Aboriginal archaeological relics are found or uncovered during the course of the work, then all works shall cease immediately in that area and the applicant shall contact NSW Environment & Heritage, and Council. Depending on the possible significance of the relics, an archaeological assessment and an excavation permit under the *National Parks & Wildlife Act 1974* may be required before further works can be considered in that area.
15. Signage will be required to be installed at the expense of the developer for the developer. The nature and location is to be approved by Council prior to installation and is to consist of:
  - One business identification sign,
  - A 24 hour emergency contact detail, and
  - Truck entering and exiting signage as required.
16. Prior to quarry production commencing, a *Typical Rural Access Standards – Articulated Driveways* access is to be constructed at the location at approximately 150m west of the existing access.
17. Within 6 months of the facility producing 5,000m<sup>3</sup> of quarry products from production commencing, the access is to be upgraded to a Basic Right Turn (BAR) intersection meeting AUSTRROADS Part 4 of the Guide to Road Design (Austroads 2017a).
18. The access is to be constructed at the expense of the developer prior to quarry production commencing, and is to be approved by Transport for NSW and Council. It is to:
  - a "Typical Rural Access Standards – Articulated Driveways" access
  - be located approximately 150m west of the existing access
  - not block the existing table drain, in order to ensure this a reinforced concrete pipe must be provided.
  - the installed culvert must have a minimum diameter of 375mm, with sloped headwalls in order to facilitate the continued effective drainage of water.
  - water runoff from the access structure is to be directed away from the access into the table drain of the Oxley Highway.
  - be a sealed pavement surface from the boundary to the edge line of the Oxley Highway.
  - have no permanent objects installed that will inhibit sight distance.
  - have any disturbed ground or vegetation suitably reinstated.
19. Within 6 months of the facility producing 5,000m<sup>3</sup> of quarry products from production commencing, the access is to be upgraded to a Basic Right Turn (BAR) intersection meeting AUSTRROADS Part 4 of the Guide to Road Design (Austroads 2017a).

#### **CONDITIONS AS REQUESTED BY TRANSPORT FOR NSW**

20. A Traffic Management Plan (TMP) be developed addressing the construction, operation and decommission phases of the proposed development. It is recommended that any TMP include a Driver Code of Conduct that includes;
  - A map of the primary haulage route/s highlighting critical locations.
  - Safety initiatives for impacts residential areas and/or school zones.
  - An induction process for vehicle operators and regular toolbox meetings.
  - A complaint resolution and disciplinary procedure.
  - Any community consultation measures proposed for peak periods.

21. The maximum daily traffic movements are to be undertaken as per the those contained within the Statement of Environmental Effects by Matthew Goodwin, Version 1.2 dated August 2020.
22. The existing access is to be closed prior to the commencement of the new access.

#### **CONDITION AS REQUESTED BY GEOLOGICAL SURVEY OF nsw – MINING, EXPLORATION & GEOSCIENCE**

23. A register of sales of aggregate is to be maintained to verifying quantities transported and to ensure annual reporting is met as per requirements of the NSW Resource Regulator.

#### **CONDITIONS TO BE COMPLETED PRIOR TO OPERATION COMMENCING**

24. The site access is to be upgraded and maintained throughout the life of the quarry operation. The access must meet the required standard as approved by Council's Director of Engineering.
25. Prior to commencement of any physical works within the road reserve of the Oxley Highway, approval is to be gained under S.138 of the *Roads Act 1993*.
26. The applicant is to make contact with the local 'Inspector of Mines', NSW Department of Industry and Investment, Mine Safety Operations Branch, prior to the commencement of operations or activities at the quarry. This is to ensure registration through the NSW Resource Regulator.
27. Approval to carry out onsite sewer disposal work must be obtained, in accordance with section 68 of the *Local Government Act 1993*, before works commence.
28. Lot 103 DP753846, Lot 2 DP1173956, and, Lots 46 & 47 DP1082562 are to be consolidated a single lot to ensure the quarry is contained within a single lot.

#### **CONDITIONS TO BE COMPLETED PRIOR TO SUBDIVISION COMMENCING**

29. A Subdivision Certificate must be obtained, in accordance with cl.157 of the *Environmental Planning and Assessment Regulation 2000*, before work commences.
30. A surveyor's plan must be submitted to Council prior to the expiry date of this development consent so that the subdivision certificate on the plan can be signed by an authorised officer.

#### **CONDITIONS RELATING TO ONGOING OPERATIONS**

31. A further application is to be made for any change, enlargement or intensification of the land use, including the display / erection of any new structure such as signage, partition walls or building fit-out (unless the proposed work is exempt from the need for consent under *State Environmental Planning Policy (Codes SEPP) 2008*).
32. Whilst the quarry is not in operation the site access should be physically closed to restrict vehicle movements from the public.
33. Trucks entering and leaving the premises that are carrying loads must be covered at all times, except during loading and unloading.
34. All vehicles are to enter and leave the site in a forward direction with no tracking of materials onto Oxley Highway for the duration of quarry life.
35. The hours of operation must be limited to 7.00am and 5.00pm, Monday to Friday and 8.00am to 1.00pm Saturday. No work is to be carried out on Sunday or public holidays.

#### **COUNCIL ADVICE ONLY**

36. Covenant/s: The applicant / owner has the responsibility of being aware of any covenant which may affect the proposal.
37. Dial Before You Dig: Underground assets may exist in the area that is subject to your application. In the interests of health and safety and in order to protect damage to third party assets please contact Dial Before You Dig at [www.1100.com.au](http://www.1100.com.au) or telephone on 1100 before excavating or erecting structures (This is the law in NSW). If alterations are required to the configuration, size, form or design of the development upon contacting the Dial Before You Dig service, an amendment to the development consent (or a new development application) may be necessary. Individuals owe asset owners a duty of care that must be observed when working in the vicinity of plant or assets. It is the individual's responsibility to anticipate and request the nominal location of

plant or assets on the relevant property via contacting the Dial Before You Dig service in advance of any construction or planning activities.

- 38. Telecommunications Act 1997 (Commonwealth); Telstra (and its authorized contractors) are the only companies that are permitted to conduct works on Telstra's network and assets. Any person interfering with a facility or installation owned by Telstra is committing an offence under the Criminal Code Act 1995 (Cth) and is liable for prosecution. Furthermore, damage to Telstra's infrastructure may result in interruption to the provision of essential services and significant costs. If you are aware of any works or proposed works which may affect or impact on Telstra's assets in any way, you are required to contact: Telstra's Network Integrity Team on phone number 1800 810 443.
- 39. New residential development and significant dwelling alterations should provide measures such as self-closing doors, fencing and gates (to prevent children from entering the garage and driveway from the house).

### Reasons For Conditions

- 1. To confirm and clarify the terms of Council's approval.
- 2. To comply with all relevant legislation.
- 3. So that the impacts of any increase in the scale or duration of operations may be assessed and appropriately controlled. Section 19 (1) (b) of the *Environmental Planning and Assessment Regulation 2000*, as amended.
- 4. To prevent and/or minimise the likelihood of environmental harm and public nuisance.
- 5. To ensure the rehabilitation of the site.
- 6. To minimise the potential for adverse impacts on the environment or public as a result of the development.
- 7. To ensure waste is disposed of in an appropriate manner.
- 8. To ensure that public infrastructure is maintained.
- 9. To minimise the potential for detrimental impacts to buildings or neighbouring properties.

### Conclusion

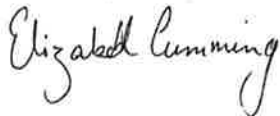

I confirm that I am familiar with the relevant heads of consideration under the Environmental Planning & Assessment Act and Local Government Act (if applicable) and have considered them in the assessment of this application.

I certify that I have no pecuniary or non-pecuniary interest in this application.

### **RE. DEVELOPMENT CONSENT 10.2020.3 - BROOKLYN QUARRY**

We are making application to modify development consent 10.2020.3 for the Brooklyn Quarry under sub-section 4.55(1A) of the Environmental Planning and Assessment Act 1979.

Sub-section 4.55(1A) provides that a consent authority (Council) may modify a development consent if it is satisfied that, amongst other things;

- (a) The proposed modification is of minimal environmental impact,
- (b) The development is substantially the same development as the development for which the consent was originally granted.

### **REQUESTED MODIFICATION (A) – Articulated Driveway**

#### **Existing Condition 17**

- 17) Within 6 months of the facility producing 5,000m<sup>3</sup> of quarry products from production commencing, the access is to be upgraded to a Basic Right Turn (BAR) intersection meeting AUSTROADS Part 4 of the Guide to Road Design (Austroads 2017a).

#### **Issue**

Based on our extensive recent consultations with staff of Transport for NSW (TfNSW), Council and road design consultants we expect that it will take a substantial period of time for the approval process for the “Basic Right Turn” process to be completed, including:

- Preparing preliminary designs, traffic management plan, environmental assessment and works authorisation applications.
- Have the preliminary documents reviewed by TfNSW and Council.
- Amend preliminary documents and seek a Works Authorisation Deed from TfNSW.

It has now also come to our attention that TfNSW requires a security bond that is 100% of the cost of the driveway upgrade. This is in addition to all work being undertaken at our cost. This security deposit will be held for 12 months after the completion of the driveway upgrade.

In recent months we have undertaken extensive planning for the commencement of drilling, blasting and crushing on the quarry site, including modelling:

- Drill hole depths, diameters and patterns.
- Bulk explosive transport requirements.
- Crusher flowchart, transportation, establishment, processing and expected yields of various aggregate sizes.
- Staffing arrangements.
- Indicative costs and income.

The modelling work has shown that it is not practical or economically viable to:

1. Drill, blast and crush less than 15,000 BCM (Bench Cubic Metres) at a time.
2. Fund the “Basic Right Turn” upgrade and security bond without significant prior sales of quarry product.

### **Requested Modified Condition 17**

We request that Walcha Council modify development consent condition 17 so that an “Basic Right Turn” driveway is required to be completed within 12 months of production exceeding 15,000 bench cubic metres.

## **REQUESTED MODIFICATION (B) – Hours of Operation**

### **Existing Condition 34**

- 34) The hours of operation must be limited to 8.00am and 5.00pm Monday to Friday and no work is to be carried out on Saturdays, Sundays or public holidays.

### **Issue**

The approved hours of operation (*condition 34*) are substantially different to those sought in the Statement of Environmental Effects (*Table 3, section 2.8, page 20*) lodged with the Development Application, as reproduced below.

**Table 3 – Proposed maximum hours of operation.**

ACTIVITY	MON TO FRI	SAT & SUN	PUBLIC HOLIDAYS
Blasting	8:00 to 17:00	No activity	No activity
Drilling, extraction & processing	Daylight hours		
Loading trucks & product shipping			
Maintenance	24 hours per day, when required		

Table 3 was reproduced in the April 2021 Extra Ordinary Council Meeting Business Paper (*Page 9*) and associated Development Assessment Report (*Council Meeting - Item 3.1 Attachments, page 43*) where Council considered the application. The Assessment Report recommended a Development Consent condition with reduced operating hours without analysis or any prior discussion with us.

It is our understanding that quarry operating hours in NSW are not subject to any mandatory restrictions or guidelines issues by NSW Planning Industry & Environment. Furthermore, operating hours are usually set by the Council through Development Consent conditions after appropriate consideration of the context and scale of the proposed quarry. Generally the most significant typical restrictions are that:

- Blasting is limited to ‘business hours’ on week days (eg 8:00 to 17:00).
- Noise producing activities are not permitted on Sundays, public holidays or outside daylight hours.

Overall the quarry cannot be operated on a practical or economically viable basis if operating hours remain restricted to those required under condition 34. Our ability to service customers would also be substantially impaired compared to similar quarries operating in the wider region.

Based on the assumption that Council would prefer reduced operating hours to those proposed in the initial application, we have reviewed Table 3 and submit an amended proposal below.

## Item 6.2 - Attachment 2

### Proposed Modified Condition 34

We request that Walcha Council modify development consent condition 34 to specify the following operating hours.

ACTIVITY	MON TO SAT	SUN	PUBLIC HOLIDAYS
Blasting	8:00 to 17:00	No activity	No activity
Drilling, extraction & processing	7:00 to 19:00	No activity	No activity
Loading trucks & shipping	7:00 to 19:00		No activity
Maintenance	24 hours per day, provided there is no significant noise at an unrelated dwelling.		

### Conclusion

We are committed to complying with Council's conditions of development consent, but respectfully request the above modifications to enable the quarry to be operated in a more practical and financially viable manner.

Yours faithfully,

Scott Blake

Brian Blake
